TC74HC4049AP/AF/AFN/AFT HEX BUFFER / CONVERTER (INVERTING) TC74HC4050AP/AF/AFN/AFT HEX BUFFER / CONVERTER

The TC74HC4049A and TC74HC4050A are high speed CMOS HEX BUFFERs fabricated with silicon gate C2MOS technology.

They achieve the high speed operation similar to equivalent LSTTL while maintaining the CMOS low power dissipation.

The TC74HC4049A is an inverting buffer, while the TC74HC4050A is a non-inverting buffer. The internal circuits are composed of 3-stages (HC4049A) or 2-stages (HC4050A) of invertaers, which provided high noise immunity and stable output.

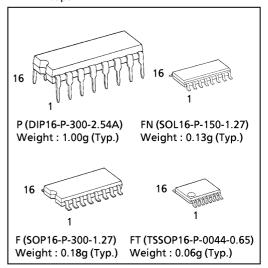

Input protection circuits are different from those of other high speed CMOS IC's. They eliminate the diodes on the $V_{\rm CC}$ side thus providing of logic - level conversion from high - level volages up to 15V to low - level voltages.

They are useful for battery back up circuits, because input voltage can be applied on IC's which are not biased by $V_{\rm CC}$.

FEATURES:

- High Speed······ t_{pd} = 9ns(typ.) at V_{CC} = 5V
- Low Power Dissipation ············ $I_{CC} = 1\mu A(Max.)$ at Ta = 25°C
- High Noise Immunity $V_{NIH} = V_{NIL} = 28\% V_{CC}$ (Min.)
- Output Drive Capability -------15 LSTTL Loads
- Symmetrical Output Impedance… | I_{OH} | = I_{OL} = 6mA (Min.)
- Balanced Propagation Delays.....toLH~toHL
- Wide Operating Voltage Range.... V_{CC} (opr.) = 2V~6V
- Pin and Function Compatible with 4049B/4050B

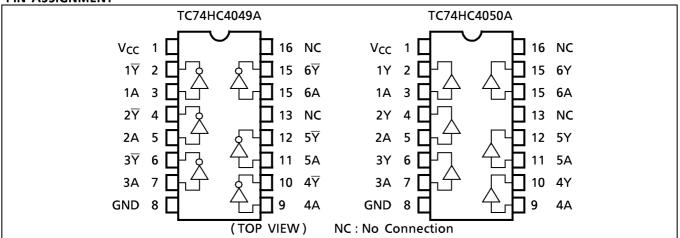

(Note) The JEDEC SOP (FN) is not available in Japan.

● TOSHIBA is continually working to improve the quality and the reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to observe standards of safety, and to avoid situations in which a malfunction or failure of a TOSHIBA product could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent products specifications. Also, please keep in mind the precautions and conditions set forth in the TOSHIBA Semiconductor Reliability Handbook.
