**NOTE:** Permanent device damage may occur if the above **Absolute Maximum Ratings** are exceeded. Functional operation should be restricted to the conditions as detailed in the operational sections of this data sheet. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

This device contains circuitry to protect the inputs against damage due to high static voltages or electric fields. However, it is advised that power applied to pins 14, 15, 16, 10, and 9 rapidly apply any voltage higher than maximum rated voltages to this high impedance circuit.

2	OSC <sub>OUT</sub>	O	<p>Output pin for crystal oscillator. Output of the inverting amplifier. This pin should be open when an external oscillator is used.</p>
3	f <sub>V</sub>	O	<p>Monitor output of the phase detector. This pin is tied to the programmable divider output.</p>
4	V <sub>DD</sub>	-	<p>Power supply voltage input.</p>
5	D <sub>O</sub>	O	<p>Three-state charge pump output of phase detector. The mode of D<sub>O</sub> is changed by the combination of programmable reference divider output frequency f<sub>r</sub>, and programmable divider output frequency f<sub>V</sub> as listed below:            fr &gt; f<sub>V</sub>: Drive mode (D<sub>O</sub> = High level)            fr = f<sub>V</sub>: High impedance            fr &lt; f<sub>V</sub>: Sink mode (D<sub>O</sub> = Low level)</p>

## FUNCTIONAL DESCRIPTION

### SERIAL DATA INPUT TIMING

**Notes:** Data: Serial data input is used for setting divide factor of programmable reference divider and programmable divider. Data is input from MSB, and last bit data is a control bit.

Control bit is set high when divide factor of programmable reference divider is set. Control bit is set low level when divide factor of programmable divider is set.

Clock: Data is input to internal shift registers by rising edge of the clock.

LE: Load enable input:

When LE is high, the data stored in shift register is transferred to 14-bit latch, or 17-bit latch depending on the control bit setting.
