### Notes

1. Simulated source impedance of 12uH. 12uH inductor in series with +Vin.
2. The ON/OFF control is an optional function . There are positive logic and negative logic. The pin voltage is referenced to negative input.  
To order positive logic ON-OFF control add the suffix ' P ' (Ex: RP10-2405P)  
To order negative logic ON-OFF control add the suffix ' N ' (Ex: RP10-2405N)
3. BELLCORE TR-NWT-000332. Case I: 50% Stress, Temperature at 40 °C. (Ground fixed and controlled environment).
4. M1 version is more efficient, therefore, it can be operated in a more extensive temperature range than standard and M2 version.
5. Heat sink is optional and P/N: 7G -0020A, Thermal impedance is 10°C/Watt for natural convection.
6. Maximum value at nominal input Voltage and full load of standard type.
7. Typical value at nominal input voltage and full load.
