

Precision Micropower 2.5V Shunt Voltage Reference

FEATURES

- Trimmed Bandgap to 0.5% and 1%
- Wide Operating Current 160 μ A to 15mA
- Extended Temperature Range: -40°C to 85°C
- Low Temperature Coefficient 100 ppm/°C
- Replacement in for LM4040

Now Available in Lead Free Packaging

APPLICATIONS

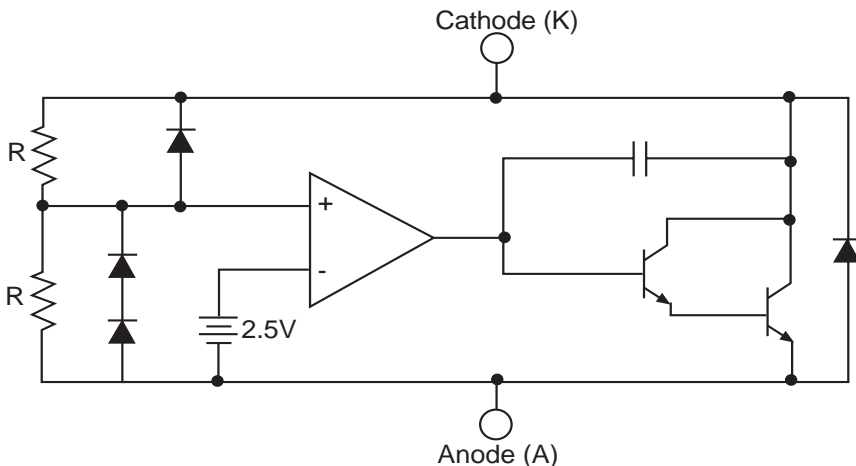

- Battery Operating Equipment
- Adjustable Supplies
- Switching Power Supplies
- Error Amplifiers
- Single Supply Amplifier
- Monitors / VCRs / TVs
- Personal Computers

DESCRIPTION

The SPX4040 is a 2-terminal, temperature compensated, bandgap voltage reference that provides a fixed 2.5V output for input currents between 160 μ A and 15mA. The bandgap voltage (2.5V) is independently trimmed from the output voltage to achieve a very low temperature coefficient. This trimming technique gives a stable device over the full temperature range (100ppm/°C).

The SPX4040 is available in 3 pin TO-92, 3 SOT-23 and 8 pin NSOIC packages. The operating temperature range is -40°C to 85°C. The SPX4040 advanced design eliminates the need for an external stabilizing capacitor while ensuring stability with any capacitive load, making it easy to use.

TYPICAL APPLICATIONS CIRCUIT

ABSOLUTE MAXIMUM RATINGS

Anode-Cathode Forward Current, (<10ms) I_{AK}	10mA
Anode-Cathode Reverse Current I_{KA}	20mA
Continuous Power Dissipation at 25°C P_D	
TO-92	550mW
SOT-23	300 mW
SOIC-8	525mW
Junction Temperature T_J	150 °C
Storage Temperature T_{STG}	-65 to 150 °C

NOTE: Stresses greater than those listed under ABSOLUTE MAXIMUM RATINGS may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.

TYPICAL THERMAL RESISTANCES

PACKAGE	θ_{JA}	θ_{JC}	TYPICAL DERATING
TO-92	160°C/W	80°C/W	6.3 mW/°C
SOT-23	575°C/W	150°C/W	1.7 mW/°C
SOIC-8	175°C/W	45°C/W	5.7 mW/°C

Typical deratings of the thermal resistances are given for ambient temperature >25°C.

ELECTRICAL CHARACTERISTICS

Electrical characteristics at $I_N = 1000\mu A$ and $T_A = +25^\circ C$ unless otherwise specified.

PARAMETERS	CONDITIONS	SPX4040A-2.5			SPX4040-2.5			UNITS
		MIN	TYP	MAX	MIN	TYP	MAX	
Reverse Breakdown Voltage	$I_R = 500 \mu A$	2.4875	2.500	2.5125	2.475	2.500	2.525	V
Reverse Breakdown Tolerance	$I_R = 500\mu A$ $-40^\circ C < T_A < 85^\circ C$			± 12 ± 29			± 25 ± 49	mV mV
Output Impedance			0.60	0.8		0.60	0.8	Ω
Noise Voltage	$0.1KHz \leq f \leq 10Hz$		15			15		μV p-p
Tempco	Note 1			100			100	ppm/°C
Turn-on Setting	1.0% of V_{OUT}		30			30		μSec
Operating Current Range	Note 2	0.16		15	0.16		15	mA
Temp. Range (ambient)		-40		85	-40		85	°C

Notes:

1. Three-point measurement guarantees the error band over the specified temperature range.
2. Optimum performance is obtained at current below 1000 μA .

APPLICATION INFORMATION

This device is designed for stable operation and has no need of an external capacitor between pins 4 and 8. The reference remains stable if a bypass capacitor is used.

SOT-23

The SPX4040 in the SOT-23 package has a parasitic Schottky diode between pin 3 and pin 1. Pin 1 of SOT-23 must float or be connected to pin 3.

Conventional Shunt Regulator

In a conventional shunt regulator application (see Figure 11), an external series resistor (R_S) is connected between the supply voltage and the

SPX4040. R_S determines the current that flows through the load (I_L) and the reference (I_Q). Since load current and supply voltage may vary, R_S should be small enough to supply at least the minimum acceptable I_Q to the reference even when the supply voltage is at its minimum and the load current is at its maximum value. When the supply voltage is at its maximum and I_L is at its minimum, R_S should be large enough so that the current flowing through the SPX4040 is less than 15mA.

R_S is determined by the supply voltage (V_S), the load and operating current (I_L and I_Q), reference's reverse breakdown voltage (V_R).

$$R_S = (V_S - V_R) / (I_L + I_Q)$$
