

REJ03D0423-0200 Rev.2.00 Feb.18.2005

The HD74LS93 contains four master-slave flip-flops and additional gating to provide a divide-by-two counter and three-state binary counter for divide-by-eight. To use this maximum count length of this counter, the B input is connected to the Q_A output. The input count pulses are applied to input A and the outputs are described in the appropriate function table.

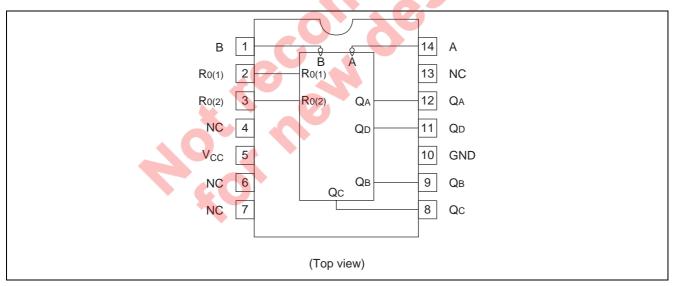

Features

• Ordering Information

Part Name	Package Type	Package Code (Previous Code)	Package Abbreviation	Taping Abbreviation (Quantity)
HD74LS93P	DILP-14 pin	PRDP0014AB-B (DP-14AV)	Р	—
HD74LS93FPEL	SOP-14 pin (JEITA)	PRSP0014DF-B (FP-14DAV)	FP	EL (2,000 pcs/reel)

Note: Please consult the sales office for the above package availability.

Pin Arrangement

Function Table

Reset / Count Function Table

Reset	inputs	Outputs						
R ₀₍₁₎	R ₀₍₂₎	Q_{D}	Q _C	Q _B	Q _A			
Н	Н	L	L	L	L			
L	Х	Count						
Х	L	Count						

Note: H; high level, L; low level, X; irrelevant

• BCD Count Sequence (Notes 1)

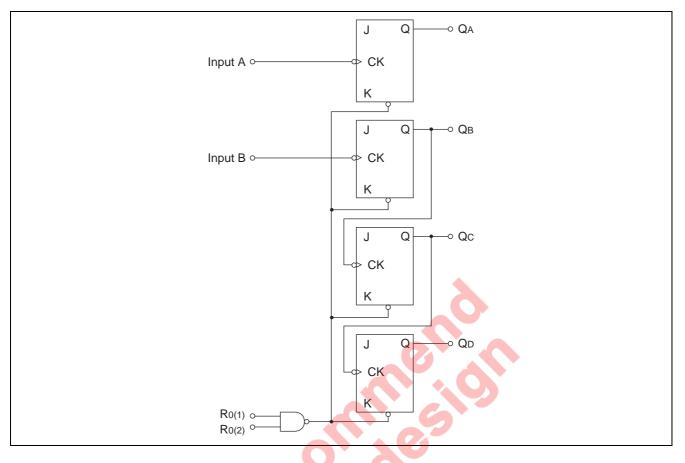

Count	Outputs							
	QD	Qc	Q _B	Q _A				
0	L	L	L	L				
1	L	L	L	Н				
2	L	L	Н	L				
3	L	L	H	Н				
4	L	Н		Н				
5	L	Н	L	Н				
6	L	Н	Н	L				
7	L	н	Н	Н				
8	Н	L		L				
9	Н	L	L	Н

Notes: * $V_{CC} = 5 V$, Ta = $25^{\circ}C$

** Q_A output is tested at specified I_{OL} plus the limit value of IIL for the B input. This permits driving the B input while maintaining full fan-out capability.

*** I_{cc} is measured with all outputs open, both R₀ inputs grounded following momentary connection to 4.5 V, and all other inputs grounded.

Keep safety first in your circuit designs! 1. Renesas Technology Corp. puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage. Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of nonflammable material or (iii) prevention against any malfunction or mishap.

- (ii) Use of nonnammapie material of (iii) prevention against any marunction of misnap.
 Notes regarding these materials are intended as a reference to assist our customers in the selection of the Renesas Technology Corp. product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Renesas Technology Corp. or a third party.
 Renesas Technology Corp. assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
 All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Renesas Technology Corp. without notice due to product improvements or other reasons. It is therefore recommended that customers contain technical inaccuracies or typographical errors. Renesas Technology Corp. assumes no responsibility for any damage, liability, or other loss rising from these inaccuracies or errors. Please also pay attention to information published by Renesas Technology Corp. by various means, including the Renesas Technology Corp. Semiconductor home page (http://www.renesas.com).
 When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Renesas Technology Corp. assumes no responsibility for any damage, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products.
