## SINGLE CHIP SURROUND PROCESSOR

REJ03F0020-0100Z

Rev.1.00

Sep.04.2003

### Description

The M65849CFP is a CMOS IC built-in Digital circuit and mixing amplifiers.

It is suitable for adding effects to Mini Stereo, CD-Radio Cassette and TV.

This IC can be used Dolby Surround.

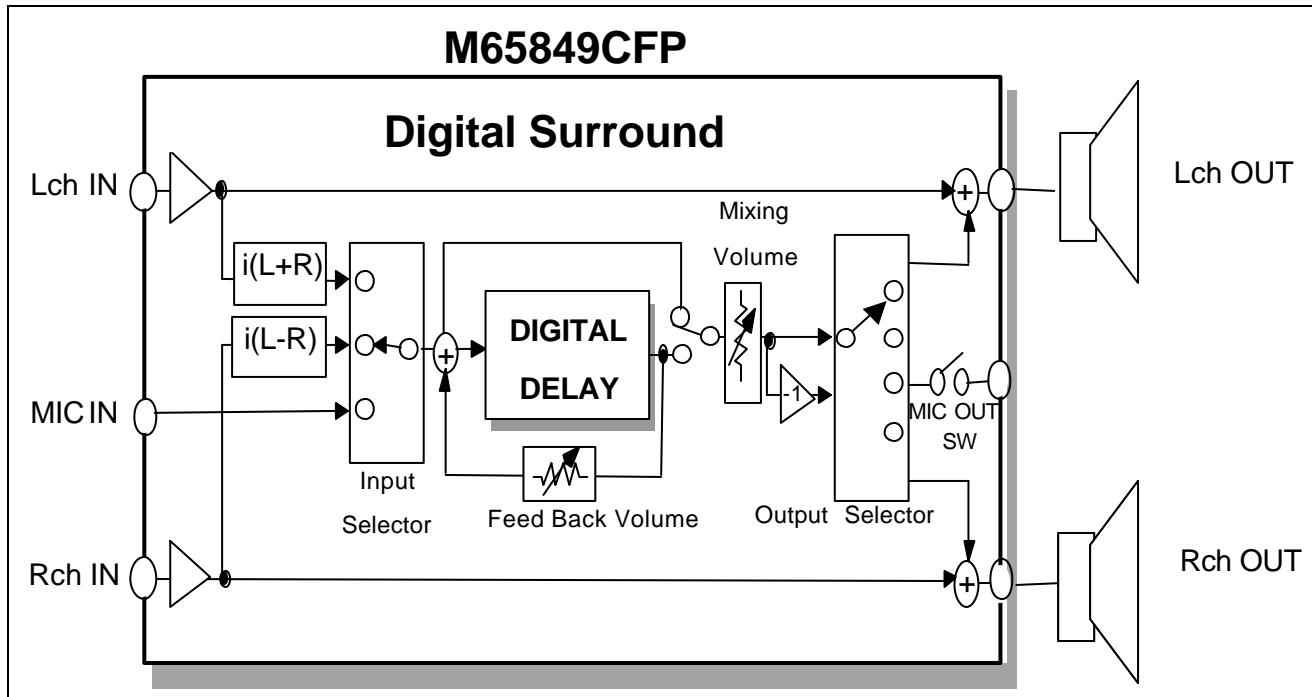

### Features

- Built- in digital delay, mixing amplifiers, input output selector
- achieve a surround system with a single chip.
- Delay volume, feedback volume Built-in
- ADM digital delay, 16kbit SRAM Built-in
- Selection of 8 steps delay time in a range between 9.2msec and 196.6msec
- Built- in automatic reset circuit activated with power on
- 5V single power supply

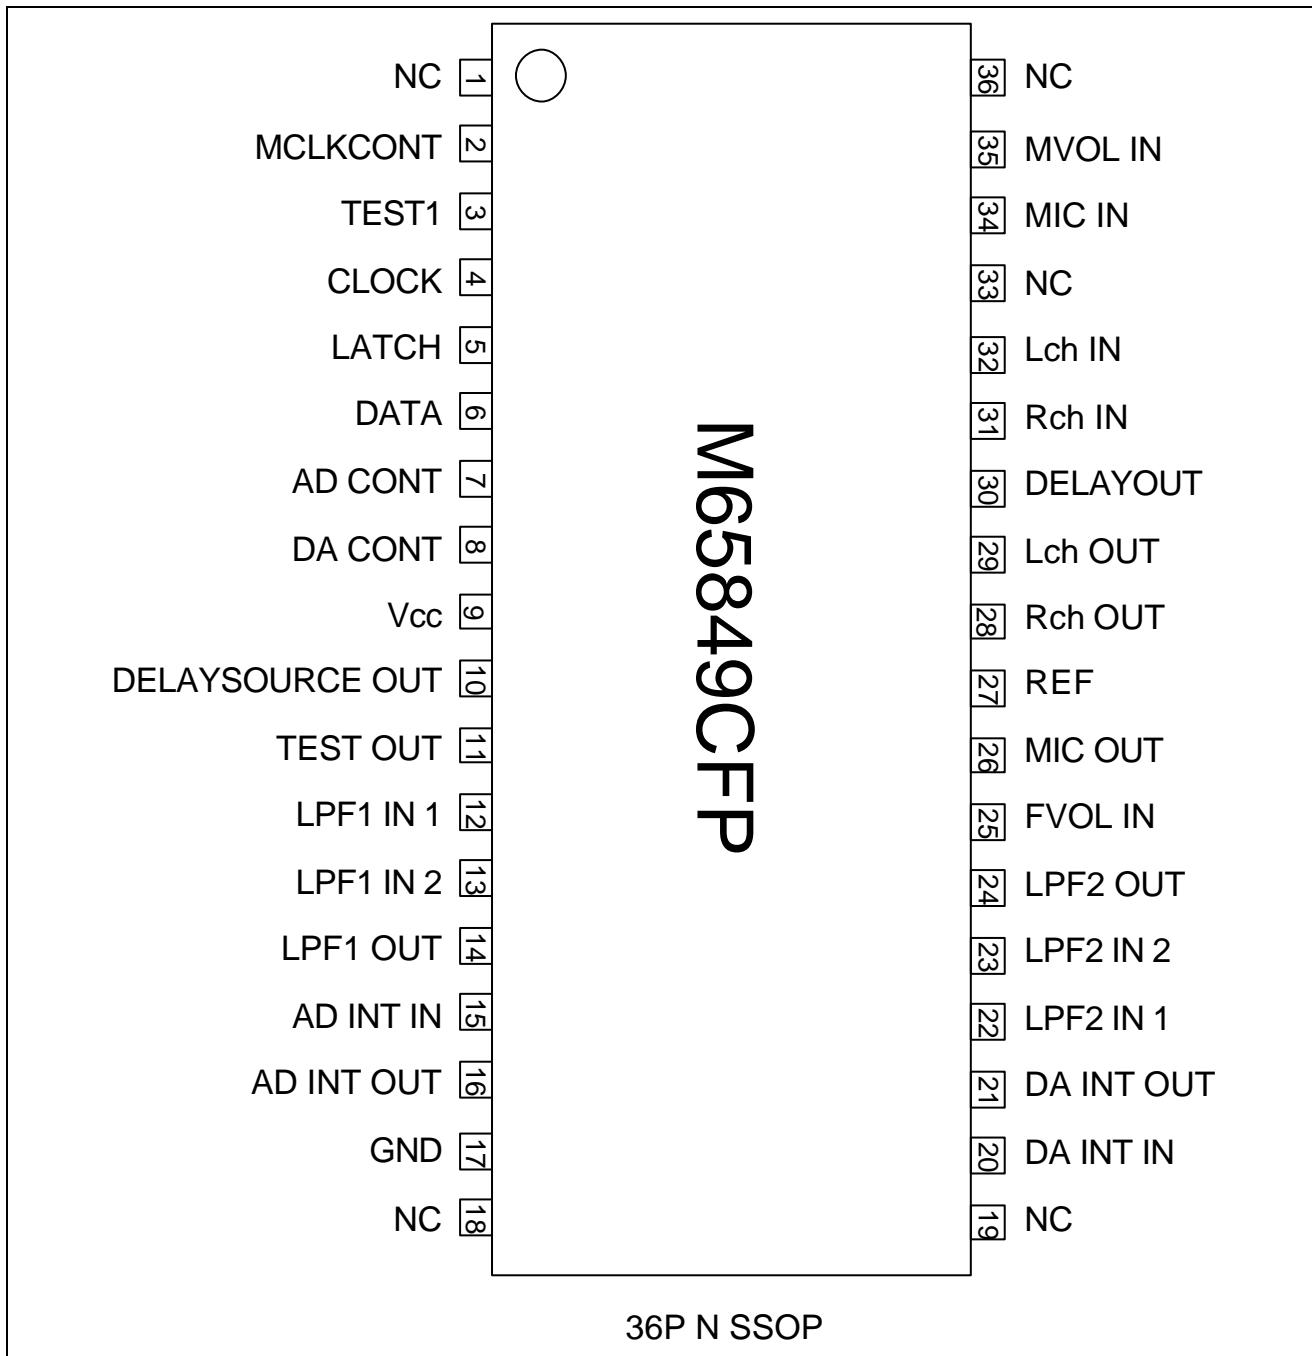

### RECOMMENDED OPERATING CONDITION

- Supply voltage range ..... Vcc=4.5 to 5.5V

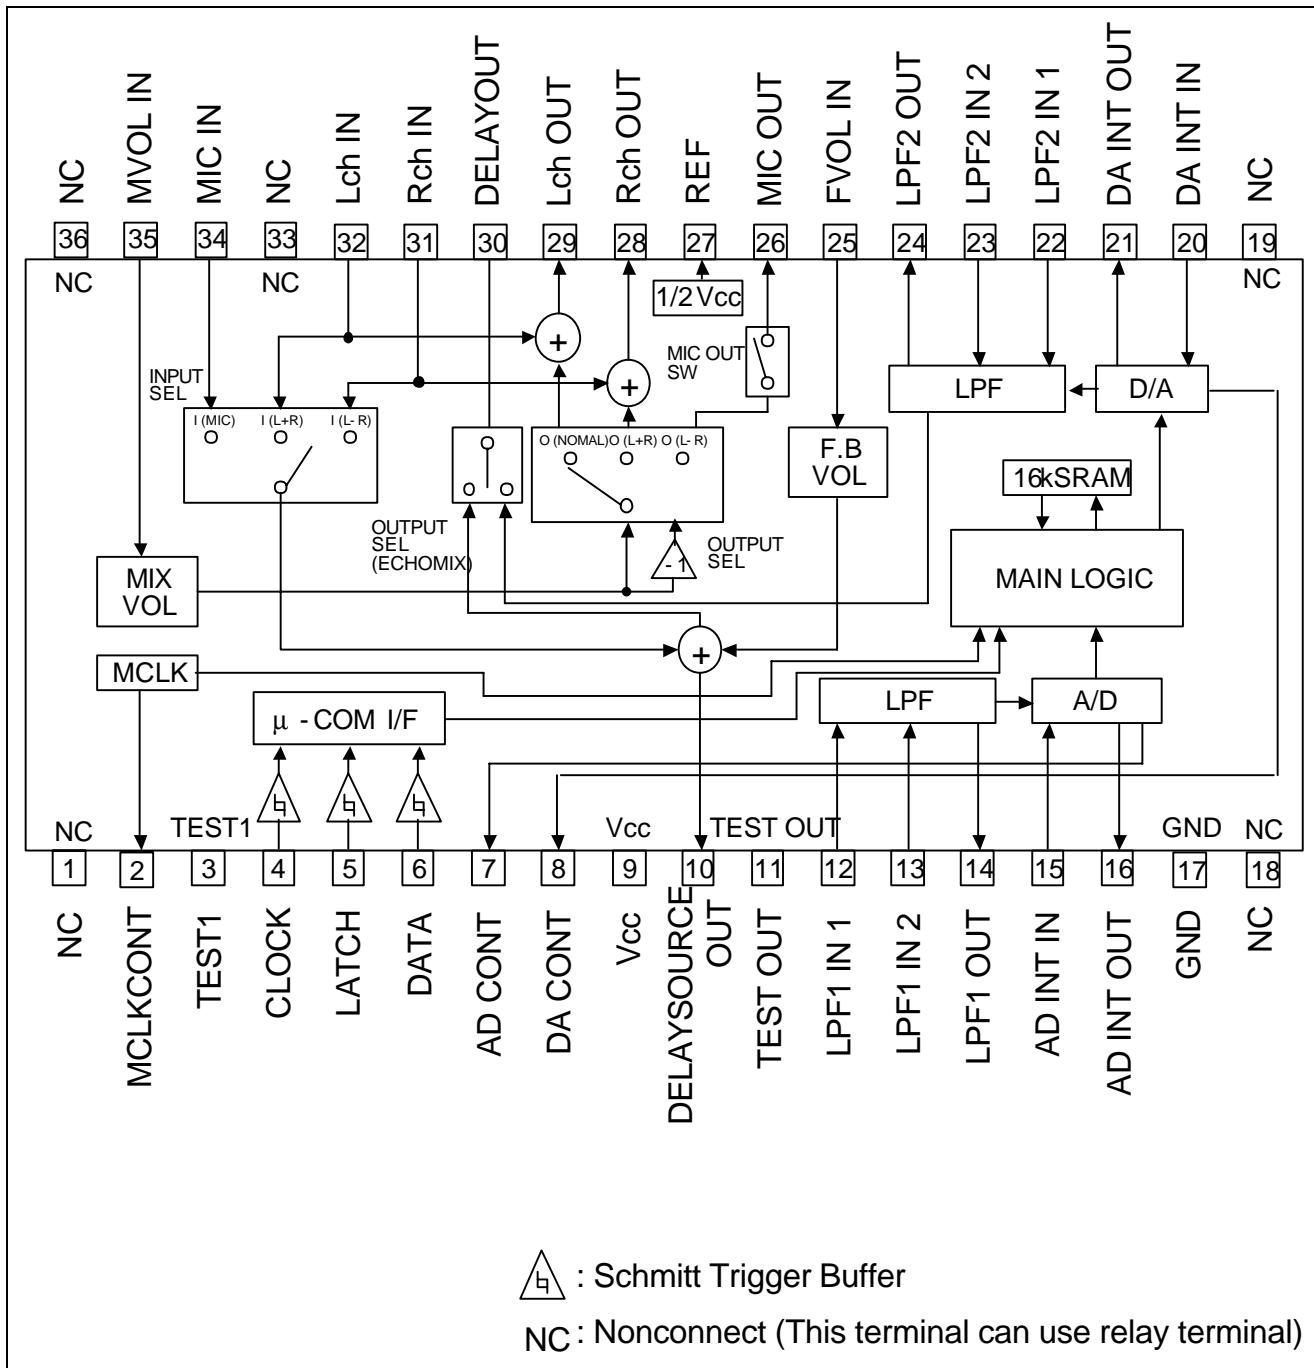

### SYSTEM CONFIGURATION

## PIN CONFIGURATION

## Block Diagram

**Pin Description**

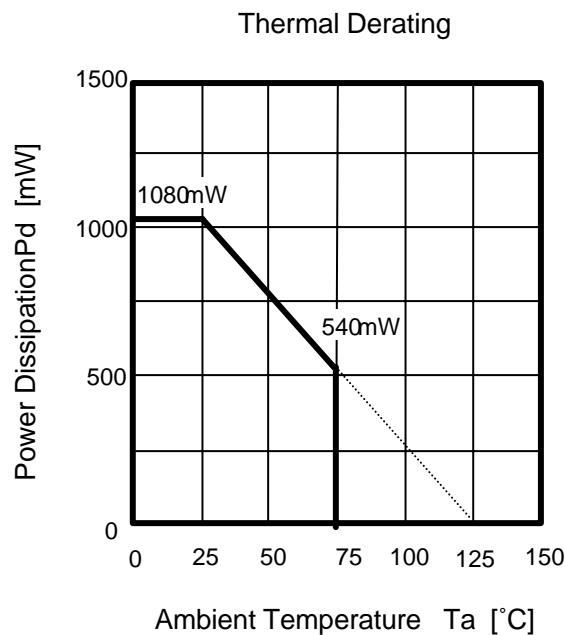

No.	Symbol	Name	I/O	Function
1	NC	NON CONNECT	—	This terminal can use relay terminal for external
2	MCLKCONT	Oscillator Input	I	Controls built-in clock generation circuit with external R
3	TEST1	Test pin	I	Test mode change "H"Normal/"L"Test (Be sure connect to Vcc at Normal mode)
4	CLOCK	CLOCK	I	Clock input via serial bus
5	LATCH	LATCH	I	Latch input via serial bus
6	DATA	DATA	I	Data input via serial bus
7	AD CONT	A/D Control	—	Decide the time constant of A/D
8	DA CONT	D/A Control	—	Decide the time constant of D/A
9	Vcc	Power Supply	—	
10	DERAYSOURCE OUT	Delay source output	O	L+R)or (L-R)or (MIC)signal Output
11	TEST OUT	Test output	O	Output (Test mode) (Be sure to open at Normal mode)
12	LPF1 IN 1	Low Pass Filter 1 Input 1	I	Prefilter placed before A/D converter for digital delay
13	LPF1 IN 2	Low Pass Filter 1 Input 2	I	
14	LPF1 OUT	Low Pass Filter 1 Output	O	
15	AD INT IN	A/D Integrator Input	I	To form D/A converter Integrator by connecting
16	AD INT OUT	A/D Integrator Output	O	external capacitor
17	GND	GND	—	
18	NC	NON CONNECT	—	This terminal can use relay terminal for external
19	NC	NON CONNECT	—	This terminal can use relay terminal for external
20	DA INT IN	D/A Integrator Input	I	Form Integrator with External C
21	DA INT OUT	D/A Integrator Output	O	
22	LPF2 IN 1	Low Pass Filter 2 Input 1	I	Form Low Pass Filter with External C,R
23	LPF2 IN 2	Low Pass Filter 2 Input 2	I	
24	LPF2 OUT	Low Pass Filter 2 Output	O	
25	FVOL IN	Feedback Volume Input	I	Feedback Volume Input
26	MIC OUT	Microphone Output	O	Microphone Output
27	REF	Reference	—	1/2 Vcc Output, Connect External C
28	Rch OUT	Rch Output	O	Rch Mixing Output
29	Lch OUT	Lch Output	O	Lch Mixing Output
30	DELAYOUT	DELAY Output	O	Delay Signal Output
31	Rch IN	Rch Input	I	Rch Input
32	Lch IN	Lch Input	I	Lch Input
33	NC	NON CONNECT	—	This terminal can use relay terminal for external
34	MIC IN	Microphone Input	I	Microphone Input
35	MVOL IN	Mix Volume Input	I	Mix Volume Input
36	NC	NON CONNECT	—	This terminal can use relay terminal for external

**Absolute Maximum Ratings**

No.	Parameter	Conditions	Ratings	Units
Vcc	Supply voltage		6.5	V
Icc	Circuit Current		50.0	mA
Pd	Power dissipation		325	mW

## Construction of Diagram

• **DELAY TIME**

There are 8 kinds of Delay Time which are from 9.2ms to 196.6ms.

• **FEEDBACK VOLUME**

There are 8 kinds of ATT. level which are from -3dB to -15dB,-∞dB.

• **MIX VOLUME**

There are 8 kinds of ATT. level which are from +3dB to -15dB,-∞dB.

• **INPUTSELECTOR**

This is the input selector which selects **I(CLOCKOFF)**, **I(L+R)**, **I(L-R)** or **I(MIC)**.

• **OUTPUTSELECTOR**

This is the output selector which selects **O(NORMAL)**, **O(L+R)**, **O(L-R)** or **O(ECHOMIX)**.

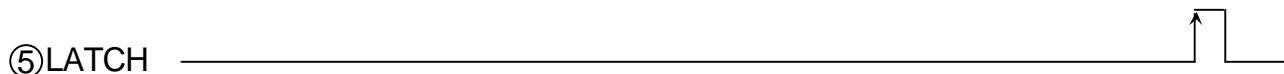

• **MIC SWITCH**

This is the ON/OFF switch for the Microphone signal.

## Operation Mode Settings

Operation mode is controlled by the 16-bit serial data inputted in accordance with the following timing.

- The (DATA is reading at the rising edge of the CLOCK and the last 16-bits are loaded at the rising edge of the LATCH.) Operation Mode Settings Operation Mode Settings

Data No.	Control Block	Control Explanation
D0	DELAY TIME	There are 8 kinds of Delay Time which are from 9.2ms to 196.6ms.
D1		
D2		
D3	INPUT SELECTOR	This is the input selector which selects I(CLKOFF), I(L-R), I(L+R) or I(MIC).
D4		
D5	OUTPUT SELECTOR	This is the output selector which selects NORMAL, O(L+R), O(L-R) or O(ECOMIX)
D6		
D7	MICOUT SW	This is the ON/OFF switch for the Microphone signal.
D8	MIX VOL	There are 8 kinds of ATT.level which are from 3dB to -15dB, -∞dB (3dB step).
D9		
D10		
D11	FEED BACK VOL	There are 8 kinds of ATT.level which are from 3dB or -15dB, -∞dB (2dB step).
D12		
D13		
D14	ADDRESS	D14=(L), D15=(H) DATA Load, the others cancel.
D15		

## Description of Control

### Delay Time Control

Control Data			DELAY TIME	The Cut Off Frequency of LPF
D0	D1	D2		
L	L	L	9.2 msec	7.3KHz
H	L	L	15.4 msec	
L	H	L	21.5 msec	
H	H	L	28.4 msec	
L	L	H	49.2 msec	3.1KHz
H	L	H	98.3 msec	
L	H	H	147.5 msec	
H	H	H	196.6 msec	

### Input Selector Control

Control Data		INPUT SELECTOR
D3	D4	
L	L	I (L +R)
H	L	I (L -R)
L	H	I (MIC)
H	H	I (CLKOFF)

### Output Selector Control

Control Data		OUTPUT SELECTOR
D5	D6	
L	L	O (L + R)
H	L	O (L - R)
L	H	O (ECHOM IX)
H	H	O (NOR MAL)

## Microphone Output Switch Control

Control Data		MICOUT SW ITCH		
D7				
L		SW OFF		
H		SW ON		

## Mix volume Control

Control Data			DELAY VOL
D8	D9	D10	
L	L	L	+ 3dB
H	L	L	0dB
L	H	L	- 3dB
H	H	L	- 6dB
L	L	H	- 9dB
H	L	H	- 12dB
L	H	H	- 15dB
H	H	H	-∞

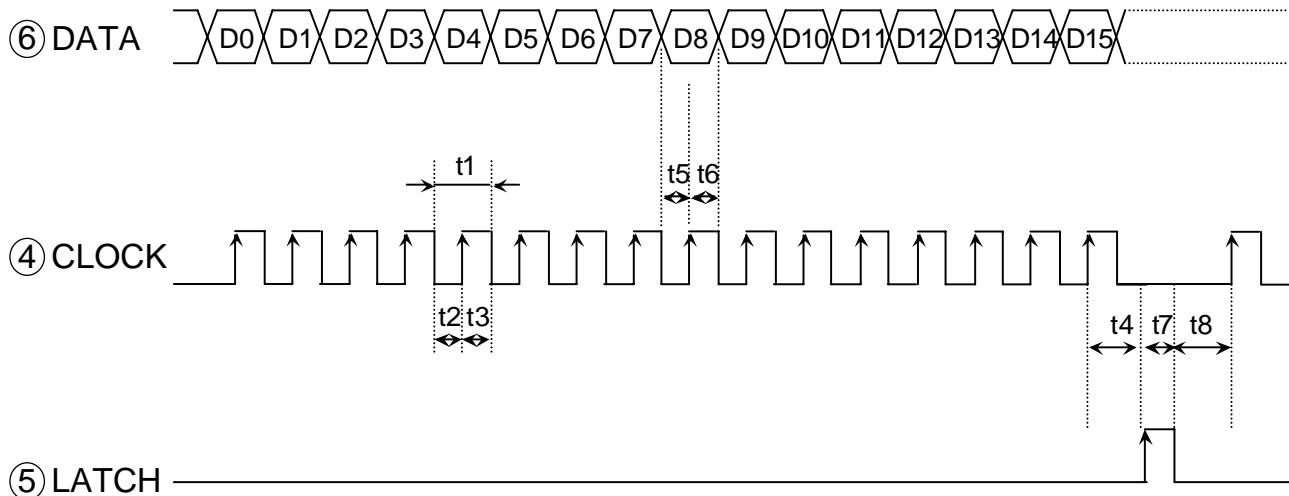

## Feedback volume Control

Control Data			FEEDBACK VOLUME
D11	D12	D13	
L	L	L	- 3dB
H	L	L	- 5dB
L	H	L	- 7dB
H	H	L	- 9dB
L	L	H	- 11dB
H	L	H	- 13dB
L	H	H	- 15dB
H	H	H	-∞

## Address Control

Control Data		ADDRESS
D14	D15	
L	L	DATA CANCEL
H	L	
L	H	DATA LOAD
H	H	DATA CANCEL

## Serial Data Input Timing

Symbol	Name	Min.	Typ.	Max.	Units
t1	CLOCK clock width	1000	—	—	ns
t2	CLOCK "L" pulse width	400	—	—	ns
t3	CLOCK "H" pulse width	400	—	—	ns
t4	LATCH rise hold time	800	—	—	ns
t5	DATA setup time	400	(t1)/2	—	ns
t6	DATA hold time	400	(t1)/2	—	ns
t7	LATCH "H" pulse width	400	—	—	ns
t8	CLOCKsetup time	400	—	—	ns

## The Power On Reset

When the IC is supplied Vcc, the reset circuit is on and after about 120ms \*<sup>1</sup> (Vcc=5V, C 27 =100  $\mu$ F )the reset circuit is off automatically.

D0	D1	D2	D3	D4	D5	D6	D7	D8	D9	D10	D11	D12	D13	D14	D15
L	L	L	H	L	H	H	L	H	H	H	H	H	H	L	L
9.2ms	I(L+R)		NORMAL			MICSW	$-\infty$			$-\infty$			DATA LOAD		

\*1 The Reset Time

The rest time depends on the external C of 27 pin and the time can be calculated as follows.

$$\text{The reset time (ms)} = 2.5 \times C (\mu\text{F})$$

example • In the case of C = 47  $\mu$ F

$$\text{The reset time} = 2.5 \times 47 = 117.5 (\text{ms})$$

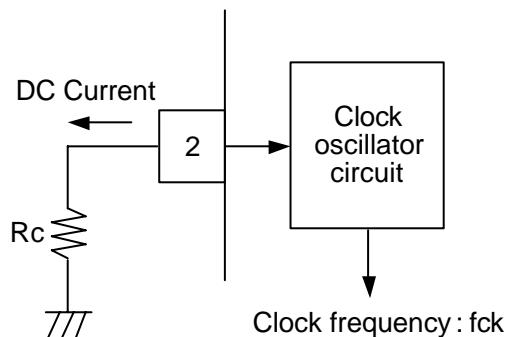

## Clock oscillator circuit

This IC incorporates a current control type clock oscillator circuit in it, thus providing circuit configuration just by connecting an  $R_c$  for current control pin 2 (CLK).

Fully internal clock supply prevents occurrence of undesired radiation without affecting any external circuit.

The oscillator frequency  $f_{CK}$  is following.

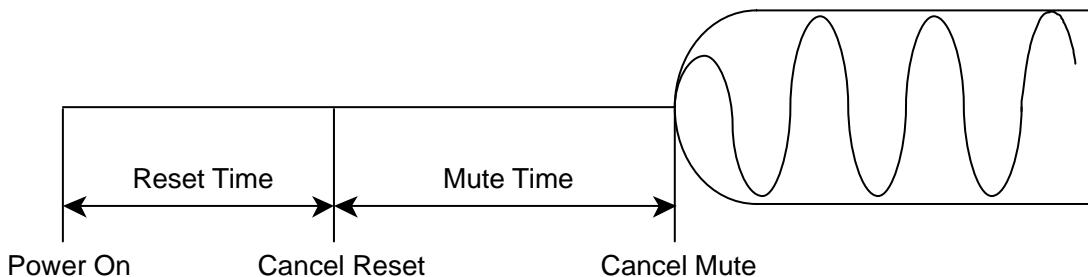

$$f_{CK} = 4\text{MHz} \quad (R_c = 22\Omega)$$

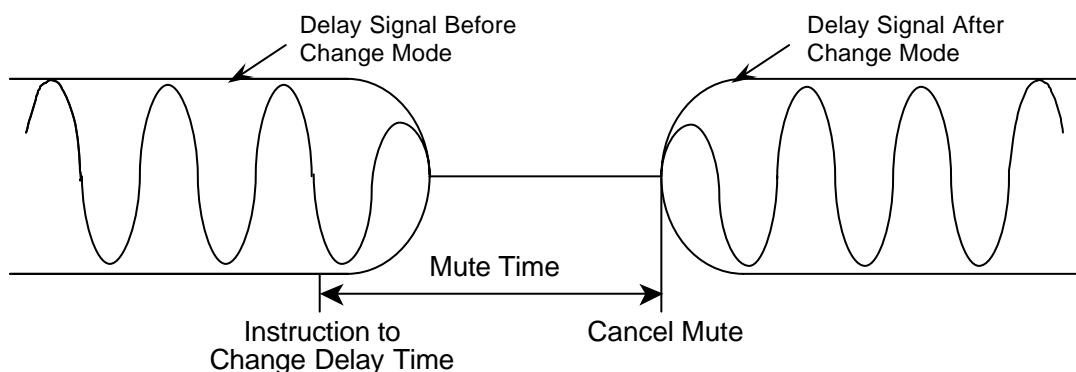

## The Auto Muting

The auto muting is active upon the power- on and the changing delay time for rejecting the shock noise.

- Upon Power- on

- Upon Changing Delay Time

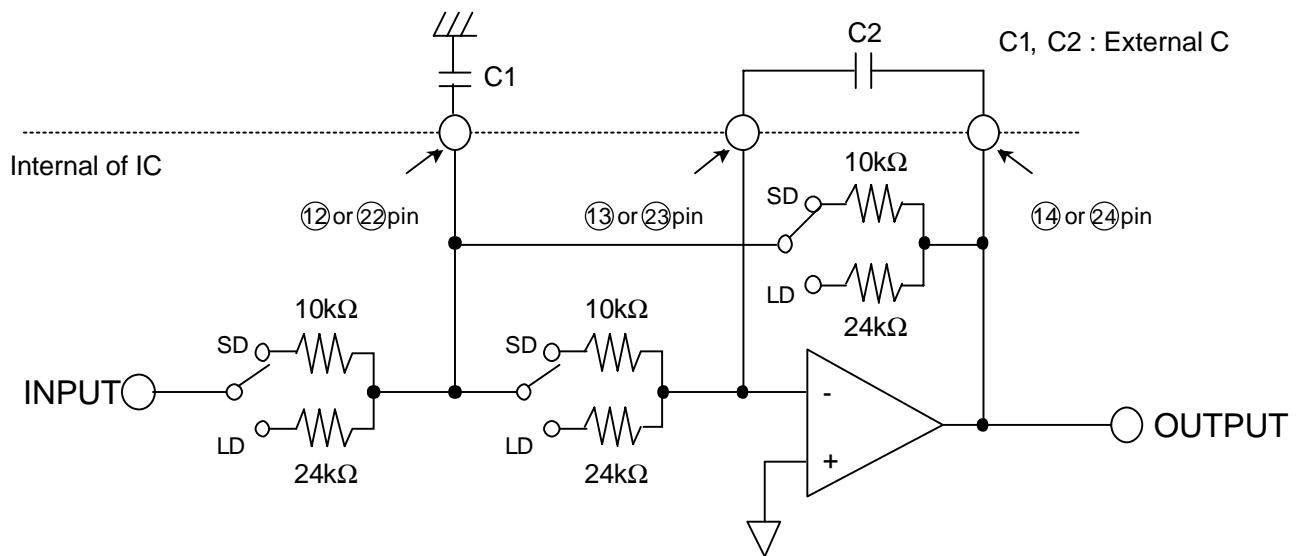

The Mute Time is set by Delay Time as follows.

DELAY TIME	MUTE TIME
Typ	Typ
9.2 to 196.6ms	410ms

## The LPF Of The Input & Output Stage Of The Digital Delay

The circuit of the LPF is as follows.

The accuracy of the internal resistors are about  $\pm 30\%$ .

<b>DELAY TIME</b>	<b>SW</b>
9.2 to 49.2 ms	SD (SHORT DELAY )
98.3 to 196.6 ms	LD (LONG DELAY )

\* The cut off frequency is calculated by the following formulas.

- Surround

$$f_C = \frac{1}{2\pi \times 10k\Omega \times \sqrt{C_1 \times C_2}}$$

- Echo

$$f_C = \frac{1}{2\pi \times 24k\Omega \times \sqrt{C_1 \times C_2}}$$

The quality factor (Q) is as follows under the conditions of both Short Delay & Long Delay.

$$Q = \frac{1}{3} \sqrt{\frac{C_1}{C_2}}$$

At all the cut off frequency is decided by the external C.

We recommend C1=0.0047  $\mu$ F, C2=0.001  $\mu$ F.

Under this condition,  $f_C$  and "are as follows.

Surround fc = 7.3kHz Q = 0.72

Echo      fc = 3.1kHz

- The Cut Off Frequency of LPF means the cut off frequency of each stage (A/D & D/A) and doesn't mean the total cut off frequency.

## Electrical Characteristics

---

Keep safety first in your circuit designs!

1. Renesas Technology Corp. puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage.

Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of nonflammable material or (iii) prevention against any malfunction or mishap.

Notes regarding these materials

1. These materials are intended as a reference to assist our customers in the selection of the Renesas Technology Corp. product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Renesas Technology Corp. or a third party.

2. Renesas Technology Corp. assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.

3. All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Renesas Technology Corp. without notice due to product improvements or other reasons. It is therefore recommended that customers contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor for the latest product information before purchasing a product listed herein.

The information described here may contain technical inaccuracies or typographical errors.

Renesas Technology Corp. assumes no responsibility for any damage, liability, or other loss rising from these inaccuracies or errors.

Please also pay attention to information published by Renesas Technology Corp. by various means, including the Renesas Technology Corp. Semiconductor home page (<http://www.renesas.com>).

4. When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Renesas Technology Corp. assumes no responsibility for any damage, liability or other loss resulting from the information contained herein.

5. Renesas Technology Corp. semiconductors are not designed or manufactured for use in a device or system that is used under circumstances in which human life is potentially at stake. Please contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor when considering the use of a product contained herein for any specific purposes, such as apparatus or systems for transportation, vehicular, medical, aerospace, nuclear, or undersea repeater use.

6. The prior written approval of Renesas Technology Corp. is necessary to reprint or reproduce in whole or in part these materials.

7. If these products or technologies are subject to the Japanese export control restrictions, they must be exported under a license from the Japanese government and cannot be imported into a country other than the approved destination.

Any diversion or reexport contrary to the export control laws and regulations of Japan and/or the country of destination is prohibited.

8. Please contact Renesas Technology Corp. for further details on these materials or the products contained therein.
