# IR91458/IR91458N

## General Purpose Dual Operational Amplifier

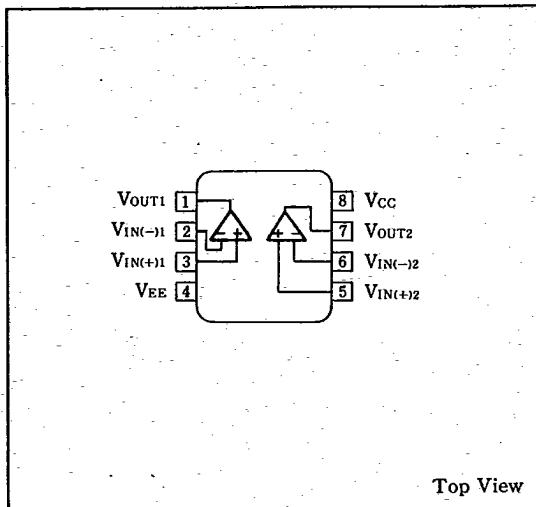

### Description

The IR91458/IR91458N is a general purpose dual operational amplifier, which have short-circuit protection for the internal frequency compensation to ensure stability without external components.

### Features

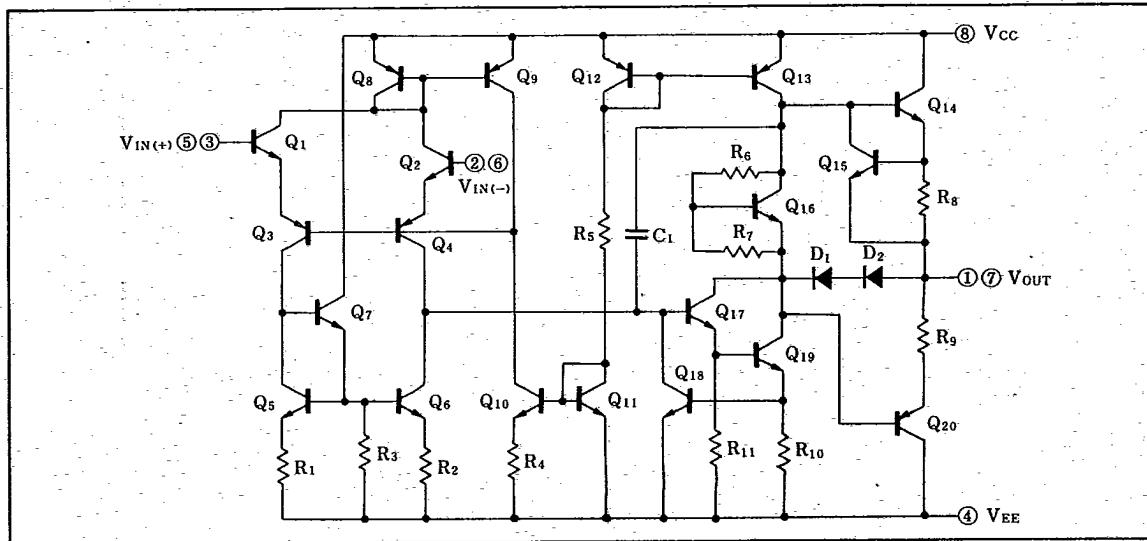

1. Short-circuit protection
2. No frequency compensation required
3. Wide common-mode and differential voltage range
4. Low power dissipation
5. 8-pin dual-in-line package (IR91458)
6. 8-pin small-outline package (IR91458N)
