TYPICAL CHIP THERMISTOR

Example: Silver Terminated Leadless BetaCHIP

Part Number

BetaCHIP Leadless Chip Thermistors:

Applications:

- Automotive temperature controls.
- Surface mounting on hybrid circuits.
- Temperature compensation of crystal oscillators.

Features:

- Rapid Time Response (< 1 second typical in liquids).
- Standards supplied with 5% and 10% tolerance.
- 1% and 2% available upon request.
- Surface Mount Capability.
- 1 mW/°C Dissipation Constant in air at 25°C.
- Uniformly Sized for Pick & Place Assembly.

Silver Metalized BetaCHIP Thermistors:

An economical alternative to the gold leadless BetaCHIP thermistors is the Silver terminated leadless BetaCHIP thermistors. These elements are manufactured using the same high quality materials as our other thermistor products. The nominal dimensions remain the same for both gold and silver chips. Custom sizes are also manufactured for customer specific applications. Silver chip elements are supplied in vials, "gel" or "waffle" packs.

Silver metalized chips may be soldered or conductive epoxied to board termination points. The use of solder containing a small quantity of silver is recommended such as 62%Sn (tin), 36%Pb (lead) and 2%Ag (silver).

SEM Photo 30x Hybrid Thermistor Chip

Figure # 1

Sample Part Number:

Gold Termination BetaCHIP Thermistors:

Applications

- WDM (Wavelength Division Multiplexing) for advanced frequency control in modern communications systems and wireless applications.
- Thermopile sensors for thermal radiation recognition and infrared sensing.
- Thermal protection of sensitive circuits.
- Hybrid circuit temperature compensation.
- Localized temperature sensing.

Features:

- Rapid Time Response (<1 second typical in liquids).
- Standards supplied with 5% and 10% tolerance.
- 1% and 2% available upon request.
- Surface Mount Capability.
- 1 mW/°C Dissipation Constant in air at 25°C.
- Uniformly Sized for Pick & Place Assembly.
- Higher precision tolerance available.
- Square and Rectangular Configurations.

BetaTHERM offer high reliability **Gold** terminated leadless BetaCHIP thermistors that meet today's hybrid microelectronics needs and are offered by BetaTHERM. With metalization on top and bottom surfaces, attachment to hybrid, IC or PC circuits is accomplished using industry standard die attach and wire bonding techniques. Chips may be soldered or conductive epoxied to board termination points where space is at a premium. Typical chip sizes (1mm x 1mm x 0.25mm thick) allow for accurate robotic placement. **Gold BetaCHIP** thermistors are supplied in "gel" or "waffle" packs.
