

Description

High luminous intensity vessel light fitting with halogen-reflector incandescent lamp for illuminating boilers, containers and agitators. The enclosure is made of copper-free aluminium.

The aluminium collar has a PTFE coating (Teflon) and is sealed with a Viton gasket. The light fitting can be fixed on to inspection windows in accordance with DIN 28120 by means of the PR fixing facility.

The built-in halogen-reflector 12 V, 50 W or 12 V, 20 W incandescent lamp is supplied by an integrated transformer.

- Transformer in the light fitting enclosure
- Generously dimensioned terminal compartment
- 12 V, 50 W or 12 V, 20 W halogen reflector lamp
- Fixing for inspection windows to DIN 28120
