

Quad Exclusive OR Gate

ELECTRICALLY TESTED PER:
5962-8755801

The 10513 is a Quad Exclusive OR Gate with an enable common to all gates. The outputs may be wire-ORed together to perform a 4-bit comparison function ($A = B$). The enable is active Low.

- 240 mW Max/Pkg (No Load)
- $t_{pd} = 2.5$ ns typ
- $t_r, t_f = 2.0$ ns typ (20% - 80%)

PIN ASSIGNMENTS

The letter "M" appears before the slash on LCC.

LOGIC DIAGRAM

**NOTES**

1. Length of Coax A and Coax B should be equal for equal time delay.
2. Unused outputs should be loaded 100Ω to ground.
3. 2:1 divider may be used.
4. $t_r = t_f = 2.0 \text{ ns} \pm 0.2 \text{ ns}$ measured at (20% - 80%).
5. $R_1 = 50 \Omega$ resistor in series with 50Ω coax constituting the 100Ω load.
6. $C_L \leq 5.0 \text{ pF}$ (including test jig).
7. $L_1 = L_2$: Matched for equal time delay. $P_W \geq 20 \text{ ns}$.

**NOTES**

1. Pulse width $\geq 20 \text{ ns}$.
2. Frequency = 1.0 MHz .
3. $t_r = t_f = 2.0 \text{ ns} \pm 0.2 \text{ ns}$

10513 QUIESCENT LIMIT TABLE *

* ELECTRICAL CHARACTERISTICS

Each MECL 10K series circuit has been designed to meet the dc specifications shown in the test table, after thermal equilibrium has been established. The circuit is in a test socket or mounted on a printed circuit board and transverse air flow greater than 500 linear fpm is maintained. Outputs are terminated through a 100 Ω resistor to - 2.0 volts.

MECL Logic Surface Mount

WHY SURFACE MOUNT?

Surface Mount Technology is now being utilized to offer answers to many problems that have been created in the use of insertion technology.

Limitations have been reached with insertion packages and PC board technology. Surface Mount Technology offers the opportunity to continue to advance the State-of-the-Art designs that cannot be accomplished with Insertion Technology.

Surface Mount Packages allow more optimum device performance with the smaller Surface Mount configuration. Internal lead lengths, parasitic capacitance and inductance that placed limitations on chip performance have been reduced.

The lower profile of Surface Mount Packages allows more boards to be utilized in a given amount of space. They are stacked closer together and utilize less total volume than insertion populated PC boards.

Printed circuit costs are lowered with the reduction of the number of board layers required. The elimination or reduction of the number of plated through holes in the board, contribute significantly to lower PC board prices.

Surface Mount assembly does not require the preparation of components that are common on insertion technology lines. Surface Mount components are sent directly to the assembly line, eliminating an intermediate step.

Automatic placement equipment is available that can place Surface Mount components at the rate of a few thousand per hour to hundreds of thousands of components per hour.

Surface Mount Technology is cost effective, allowing the manufacturer the opportunity to produce smaller units and offer increased functions with the same size product.

MECL AVAILABILITY IN SURFACE MOUNT

Motorola is now offering MECL 10K and MECL 10KH in the PLCC (Plastic Leaded Chip Carrier) packages.

MECL in PLCC may be ordered in conventional plastic rails or on Tape and Reel. Refer to the Tape and Reel section for ordering details.

TAPE AND REEL

Motorola has now added the convenience of Tape and Reel packaging for our growing family of standard Integrated Circuit products. The packaging fully conforms to

the latest EIA RS-481A specification. The antistatic embossed tape provides a secure cavity sealed with a peel-back cover tape.

GENERAL INFORMATION

- Reel Size 13 inch (330 mm) Suffix: R2
- Tape Width 16 mm
- Units/Reel 1000

MECHANICAL POLARIZATION

ORDERING INFORMATION

- Minimum Lot Size/Device Type = 3000 Pieces.
- No Partial Reel Counts Available.
- To order devices which are to be delivered in Tape and Reel, add the appropriate suffix to the device number being ordered.

EXAMPLE:

ORDERING CODE

MC10100FN
MC10100FNR2
MC10H100FN
