Series 8343

Right Angle 'D'Subminiature **Connectors**

The Varelco Series 8343 right-angle 'D' Type subminiature connectors for printed circuit board mounting meet the three world wide accepted standards for different PCB drilling patterns whilst remaining mutually intermateable.

The connectors are available with 9, 15, 25 & 37 contacts.

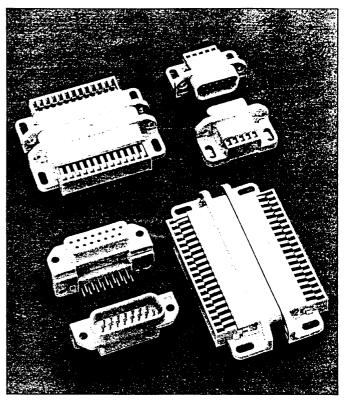

Style 11. US Pattern.

Style 11 connectors are directly interchangeable with U.S. versions and have the following compatible design features.

- 1. Mounting holes to edge of PCB.
- Edge of PCB to hole centres of first row of connector
- Connector mounting hole centres to centre of first row of connector spills.
- Spacing between contact spill rows.
- 5. Overall height of plug or socket.

Styles 12 & 13. European Patterns.

Styles 12 & 13 connectors are directly intermateable with European style connectors. Style 12 have 2.54mm solder spill spacing. Style 13 have 2.84mm solder spill spacing. For both styles the connector mounting hole to edge of PCB dimension and overall height of plug or socket are compatible.
