◆ **Precautions For Use**

● **Over-current-proof**

Customer must apply resistors for protection, otherwise slight voltage shift will cause big current change (Burn out will happen)

● **Storage**

1. The operation of temperature and R.H are:  $5^{\circ}\text{C} - 30^{\circ}\text{C}$ , R.H. 60% Max.
2. Once the package is opened, the products should be used within a week. Otherwise, they should be kept in a damp proof box with desiccating reagent. Considering the tape life, we suggest our customers to use our products within 1.5 year (from production date).
3. It's recommended to bake before soldering when the package is unsealed after 72hrs. The condition is:  $60^{\circ}\text{C} \pm 5^{\circ}\text{C}$  for 15 hrs.

◆ **Soldering Iron:**

- Temperature at tip of iron:  $300^{\circ}\text{C}$  Max. (25W Max)
- Soldering time:  $3 \pm 1$  sec.
