ISSUE No.1.

SHEET 1 of 1

DIECAST BOX No 459-0090.

278-865.

STANDARD DIECAST BOXES:

Natural finish, diecast aluminium enclosures for numerous uses
e.g., instruments electronic circuitry junction boxes etc.

The close fitting lid is secured by four, six or eight
(depending on box size) countersunk screws. An internal
lip provides effective EMC screening.

Internal guide slots allow the interior to be subdivided by screens,
dividers, PCBs or component mounting boards.

Aluminium alloy LM 24 to British Standard BS1490.

MATERIAL: TEMPERATURES UP TO 250°C CAN BE USED, AS LM24 RETAINS
A HIGH PROPORTION OF IT'S ROOM TEMPERATURE STRENGTH
PROPERTIES AT THESE TEMPERATURES.

Screws: M3.5 zinc plated steel, supadrive countersunk head,
corflex N taptite.

GENERAL WALL THICKNESS - 1.9mm. (nominal)
