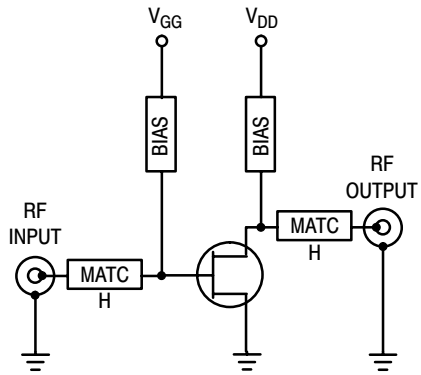
MRFG35003MT1
BWA

BWA
2.4-2.5 GHz



Device Characteristics (From Device Data Sheet)

Designed for WLL/MMDS/BWA or UMTS driver applications with frequencies from 1.8 to 3.6 GHz. Devices are unmatched and are suitable for use in Class AB linear base station applications.

- Typical W-CDMA Performance: -42 dBc ACPR, 3.55 GHz, 12 Volts, I_{DQ} = 55 mA, 5 MHz Offset/3.84 MHz BW, 64 DPCH (8.5 dB P/A @ 0.01% Probability)
  - Output Power — 300 mWatt
  - Power Gain — 11.5 dB
  - Efficiency — 25%
- 3 Watts P1dB @ 3.55 GHz
- Excellent Phase Linearity and Group Delay Characteristics
- High Gain, High Efficiency and High Linearity
- N Suffix Indicates Lead-Free Terminations

Reference Design Characteristics

- Typical Single-Channel W-CDMA Performance: -45 dBc ACPR, 2.45 GHz, 12 Volts, I_{DQ} = 55 mA, 5 MHz Offset/3.84 MHz BW, 64 DPCH (8.5 dB P/A @ 0.01% Probability)
  - Output Power — 350 mWatt
  - Power Gain — 12.5 dB
  - Efficiency — 26%

MRFG35003NT1(MT1) BWA 2.4-2.5 GHz REFERENCE DESIGN

Designed by: Monte Miller and Rick Hooper

This reference design is designed to demonstrate the typical RF performance characteristics of the MRFG35003NT1(MT1) when applied for the 2.4-2.5 GHz W-CDMA frequency band. The reference design is tuned for the best tradeoff between good W-CDMA linearity and good power capability and efficiency.

REFERENCE DESIGN LIBRARY TERMS AND CONDITIONS

Freescale is pleased to make this reference design available for your use in development and testing of your own product or products, without charge. The reference design contains easy-to-copy, fully functional amplifier designs. Where possible, it consists of “no tune” distributed element matching circuits designed to be as small as possible, includes temperature compensated bias circuitry, and is designed to be used as “building blocks” for our customers.

HEATSINKING

When operating this fixture please provide adequate heatsinking for the device. Excessive heating of the device will prevent repeating of the included measurements.

NONLINEAR SIMULATION

To aid the design process and help reduce time to market for our customers, Freescale provides device models for several commercially available harmonic balance simulators. Our model Library is available for all major computer platforms supported by these simulators. For details on the RF model library and supported harmonic balance simulators, go to the following url:

Freescale has begun the transition of marking Printed Circuit Boards (PCBs) with the Freescale Semiconductor signature/logo. PCBs may have either Motorola or Freescale markings during the transition period. These changes will have no impact on form, fit or function of the current product.
