

iC-PT 2613

6-CH. PHASED ARRAY OPTO ENCODER (26-1250)

preliminary

Rev A3, Page 1/10

FEATURES

- Monolithic photodiode array with excellent signal matching
- Very compact size for small encoders
- Moderate track pitch for relaxed assembly tolerances
- Low noise signal amplifiers with high EMI tolerance
- Single-pin programming of 3 operating modes: analog, digital, and x2 interpolation
- Ungated/gated Z index signal (1 T, 0.5 T)
- Complementary outputs: A, B, Z and NA, NB, NZ
- U, V, W commutation signals, analog and digital
- All outputs +/- 4 mA push-pull, current-limited and short-circuit-proof
- LED power control with 40 mA high-side driver
- Single 3.5 V to 5.5 V operation, low power consumption
- Operating temperature range of -40 to +85 °C (optional -40 to +120 °C)
- Suitable code disc: PT6S 26-1250 (glass)
- OD \varnothing 26.0 mm, ID \varnothing 11.6 mm, optical radius 11.0 mm, 1250 ppr and 4 ppr commutation (90°)

APPLICATIONS

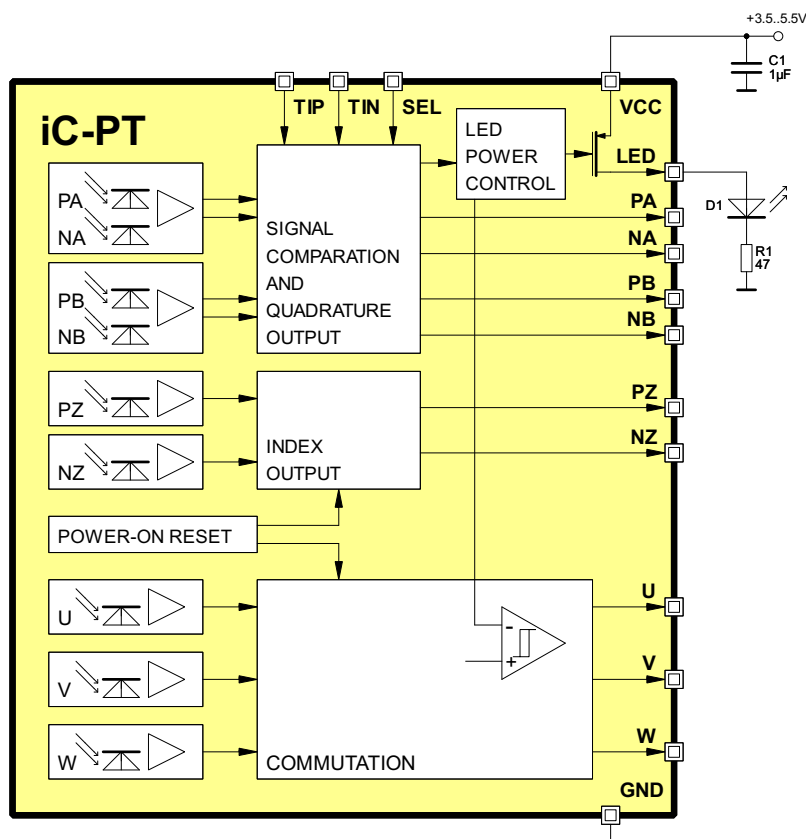

- Incremental encoder
- BLDC motor commutation

DESCRIPTION

iC-PT2613 is an optical sensor IC with integrated photosensors whose signals are converted into voltages by low-noise transimpedance amplifiers. Precise voltage comparators with hysteresis are used to generate the digital signals, supplied to the output pins via differential +/- 4 mA push-pull drivers.

The built-in LED power control with its 40 mA driver stage permits a direct connection of the encoder LED. Regardless of aging or changes in temperature the received optical power is kept constant. An external resistor presets the photocurrent operating point and thus the desired illumination level.

Selection input SEL chooses for three different operating modes: regular A/B operation, A/B operation with 2-fold interpolation, or analog operation. With analog operation the amplified signal voltages are

available at the outputs for inspection and monitoring encoder assembly.

Typical applications of iC-PT devices are incremental encoders for motor feedback and commutation. To this end, device version iC-PT2613 provides differential A/B tracks and a differential index track, each consisting of multiple photo sensors. The layout of the signal amplifiers is such that there is an excellent paired channel matching, eliminating the needs for signal calibration in most cases.

Additionally, three more tracks are provided to generate motor commutation information for the U, V and W outputs, for instance with 90 degree phase shift to operate 4-phase brushless motors (period count and phase shift can be varied by the code disc applied).

PACKAGES

PAD LAYOUT

Chip size 2.88 mm x 3.37 mm

PAD FUNCTIONS

No. Name Function

See pin configuration.

PIN CONFIGURATION

oQFN32-5x5 (5 mm x 5 mm)

PIN FUNCTIONS

No. Name Function

1	VCC	+3.5..5.5 V Supply Voltage
2	LED	LED Controller, High-Side Current Source Output
3	PA	Push-Pull Output A+ / Test Sig. Sin+
4	NA	Push-Pull Output A- / Test Sig. Sin-
5	PB	Push-Pull Output B+ / Test Sig. Cos+
6	NB	Push-Pull Output B- / Test Sig. Cos-
7	PZ	Push-Pull Output Z+ / Test Signal Z+
8	NZ	Push-Pull Output Z- / Test Signal Z-
9..16	n.c.	
17	SEL	Op. Mode Selection Input: lo = digital hi = x2 interpolated open = analog (alignment aid)
18	W	Push-Pull Output W / Test Signal W
19	TIN	Negative Test Current Input
20	V	Push-Pull Output V / Test Signal V
21	TIP	Positive Test Current Input
22	U	Push-Pull Output U / Test Signal U
23	n.c.	
24	GND	Ground
25..32	n.c.	
	BP	Backside Paddle

Pin numbers marked n.c. are not in use. The backside paddle is not intended as an electrical connection point; when used as shield a single link to GND is permissible. The test pins TIP and TIN may remain unconnected. Capacitive pin loads must be avoided when using the analog test signals for alignment purposes.

ABSOLUTE MAXIMUM RATINGS

These ratings do not imply operating conditions; functional operation is not guaranteed. Beyond these ratings device damage may occur.

Item No.	Symbol	Parameter	Conditions	Limits		Unit
				Min.	Max.	
G001	VCC	Supply Voltage		-0.3	6	V
G002	I(VCC)	Current in VCC		-20	20	mA
G003	V()	Voltage at Output Pins PA, NA, PB, NB, PZ, NZ, U, V, W		-0.3	VCC + 0.3	V
G004	I()	Current in Output Pins PA, NA, PB, NB, PZ, NZ, U, V, W		-20	20	mA
G005	V()	Voltage at LED		-0.3	VCC + 0.3	V
G006	I()	Current in LED		-120	20	mA
G007	V()	Voltage at TIP, TIN, SEL		-0.3	VCC + 0.3	V
G008	I()	Current in TIP, TIN, SEL		-20	20	mA
G009	Vd()	ESD Susceptibility, all pins	HBM, 100 pF discharged through 1.5 kΩ		2	kV
G010	Tj	Junction Temperature		-40	150	°C
G011	Ts	Chip-Storage Temperature Range		-40	150	°C

THERMAL DATA

Item No.	Symbol	Parameter	Conditions	Limits			Unit
				Min.	Typ.	Max.	
T01	Ta	Operating Ambient Temperature Range (extended range on request)		-40		85	°C
T02	Ts	Permissible Storage Temperature Range		-40		85	°C
T03	Tpk	Soldering Peak Temperature	tpk < 20 s, convection reflow tpk < 20 s, vapor phase soldering MSL 5A (max. floor live 24 h at 30 °C and 60 % RH); Please refer to customer information file No. 7 for details.			245 230	°C °C

All voltages are referenced to ground unless otherwise stated.

All currents flowing into the device pins are positive; all currents flowing out of the device pins are negative.

APPLICATION CIRCUITS

For encoder circuit examples, refer to the data sheet of iC-PT3313, available separately.

iC-Haus expressly reserves the right to change its products and/or specifications. An info letter gives details as to any amendments and additions made to the relevant current specifications on our internet website www.ichaus.de/infoletter; this letter is generated automatically and shall be sent to registered users by email.

Copying – even as an excerpt – is only permitted with iC-Haus' approval in writing and precise reference to source.

iC-Haus does not warrant the accuracy, completeness or timeliness of the specification and does not assume liability for any errors or omissions in these materials.

The data specified is intended solely for the purpose of product description. No representations or warranties, either express or implied, of merchantability, fitness for a particular purpose or of any other nature are made hereunder with respect to information/specification or the products to which information refers and no guarantee with respect to compliance to the intended use is given. In particular, this also applies to the stated possible applications or areas of applications of the product.

iC-Haus conveys no patent, copyright, mask work right or other trade mark right to this product. iC-Haus assumes no liability for any patent and/or other trade mark rights of a third party resulting from processing or handling of the product and/or any other use of the product.

As a general rule our developments, IPs, principle circuitry and range of Integrated Circuits are suitable and specifically designed for appropriate use in technical applications, such as in devices, systems and any kind of technical equipment, in so far as they do not infringe existing patent rights. In principle the range of use is limitless in a technical sense and refers to the products listed in the inventory of goods compiled for the 2008 and following export trade statistics issued annually by the Bureau of Statistics in Wiesbaden, for example, or to any product in the product catalogue published for the 2007 and following exhibitions in Hanover (Hannover-Messe).

We understand suitable application of our published designs to be state-of-the-art technology which can no longer be classed as inventive under the stipulations of patent law. Our explicit application notes are to be treated only as mere examples of the many possible and extremely advantageous uses our products can be put to.
