
COMMERCIAL GRADE LED LIGHTED AND WATERTIGHT SEALED

The OTTO LP9 Lighted Dome series is a quality precision switch designed for use in panels, control grips, instruments, heavy equipment and other demanding applications where attractive, rugged, lighted pushbutton switches are required.

The LP9 series offers a positive tactile feedback signaling the operator when the switch is operated with the added benefit of reliable LED illumination. The LP9 series offers four button versions; flush and raised profile with either a glossy or matte finish. Also comes with a threaded case for hex nut mounting while providing a short behind-panel depth.

The LP9 series is constructed to meet the IP68 watertight seal. Expect a minimum of 25, 0000 operations at full rated load of 5 amperes resistive or 3 amperes inductive; up to 500,000 operations in low level switching.

The LP9 series are momentary snap action double break switches, available in standard and low operate forces. The LED is available in 5 colors and has the ability to accommodate 2 and 12 VDC

Quality Features:

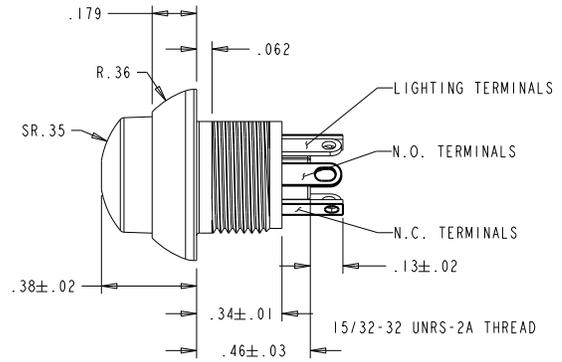

- **Watertight per IP68 (submersible to 1 meter water pressure)**
- **LED lighted with the ability to accommodate 2 and 12 VDC**
- **LED available in 5 colors**
- **Flush and raised button style**
- **Matte and glossy button finish**
- **Positive tactile feedback contact transfer**
- **Withstands extreme shock and vibration**
- **Short behind panel depth**
