

0B and 1B Series three contact and 1B Series six contact connectors

For audio mono applications, LEMO offers multicontact connectors with 3 contacts and for stereo applications multicontact connectors with 6 contacts. They can be fitted with coloured accessories enabling to create a code system like for 0S and 1S Series.

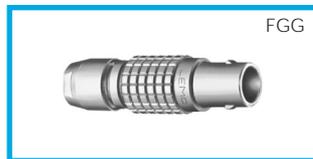

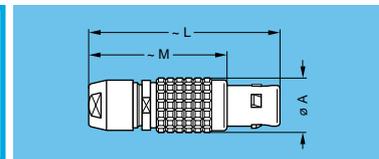

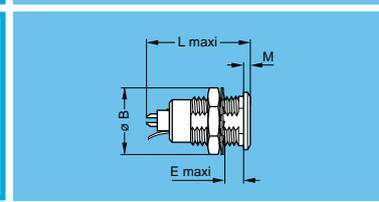

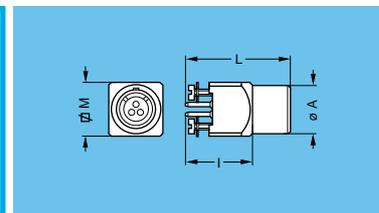

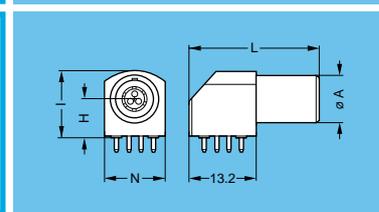

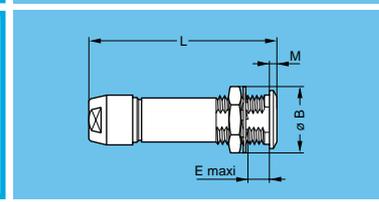

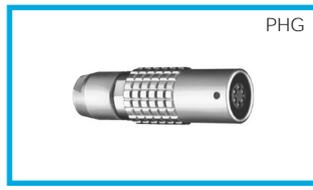

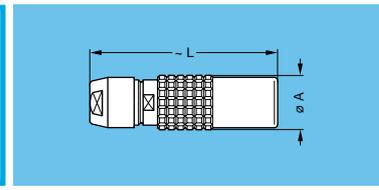

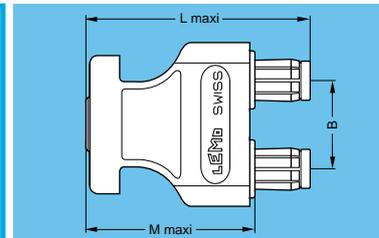

Part number example

FGG.0B.303.CLAD52 Straight plug with key (G) and cable collet, 0B Series, multicontact type with 3 contacts, chromed brass housing, PEEK insulator, male solder contact, 5.2 mm, type D collet.

Type of contact / Type de contact Max. cable ø / ø max. du câble

Ref. Ref.	Type Type	Mod. Mod.	Series Série		ø cable câble (mm)	Ref. Réf.
			0B	1B

			●	●	7.5	76
			●	●		

1) Collet nut for cable sleeve not available.
1) Poulet pour manchon de protection pas disponible.

Connecteurs à 3 contacts séries 0B et 1B et à 6 contacts série 1B

For audio mono applications, LEMO offers multicontact connectors with 3 contacts, for stereo applications multicontact connectors with 6 contacts. Like the 0S and 1S series, they can be equipped with coloured accessories allowing to create a coding system.

Composition de la référence

FGG.0B.303.CLAD52 Fiche droite avec guide (G) et serre-câble, série 0B, du type multicontacts à 3 contacts, corps en laiton chromé, isolant en PEEK, contacts de type mâle à souder, serrage de câble de type D d'un diamètre maximum de 5.2 mm.

For all collet nut connectors, adding a Z to the end of the part number means there is a collet nut to be used for mounting the cable sleeve. For bridge-plugs, the last letter of the part number indicates the shell colour (N= black). For the other colours, please refer to the page 31 table. The (*) in the part number below are to be replaced by the chosen contact type as well as the max. diameter of the cable to be used as shown in the example.

Pour les modèles à serre-câble, la lettre Z à la fin de la référence indique la présence d'un poulet de serrage prévu pour le montage d'un manchon de protection du câble. Pour les cavaliers de pontage, la dernière lettre de la référence indique la couleur du boîtier (N= Noir). Pour les autres couleurs, voir le tableau page 31. Les (*) des références ci-dessous sont à remplacer par le type de contact choisi ainsi que le diamètre maximum du câble utilisé comme indiqué dans l'exemple de composition de la référence.
