

CMOS 8-bit Single Chip Microcomputer

Description

The CXP832P40A is a CMOS 8-bit single chip microcomputer integrating on a single chip an A/D converter, serial interface, timer/counter, time base timer, 32kHz timer/counter, capture timer counter, LCD controller/driver, remote control reception circuit and 14-bit PWM output besides the basic configurations of 8-bit CPU, PROM, RAM, and I/O port.

Also the CXP832P40A provides sleep/stop function which enables to lower power consumption.

The CXP832P40A is the PROM-incorporated version of the CXP83240A with built-in mask ROM. This provides the additional feature of being able to write directly into the program. Thus, it is most suitable for evaluation use during system development and for small-quantity production.
