1MDL06-050-15AN05	74	4.42	1.1		4.17	2.6	

Performance data are given for 300K, vacuum

Dimensions

Manufacturing options

A. TEC Assembly:

- * 1. Solder SnSb (T_{melt}=230°C)
 2. Solder AuSn (T_{melt}=280°C)

B. Ceramics:

- 1.Pure Al₂O₃(100%)
- 2.Alumina (Al₂O₃- 96%)
- * 3.Aluminum Nitride (AIN)
- * used by default

C. Ceramics Surface Options:

- 1. Blank ceramics (not metallized)
- 2. Metallized (Au plating)
- 3. Metallized and pre-tinned with:
 - 3.1 Solder 117 (In-Sn, T_{melt} =117°C)
 - 3.2 Solder 138 (Sn-Bi, T_{melt} = 138°C)
 - 3.3 Solder 143 (In-Ag, T_{melt} = 143°C)
 - 3.4 Solder 157 (In, T_{melt} = 157°C)
 - 3.5 Solder 183 (Pb-Sn, T_{melt} =183°C)
- 3.6 Optional (specified by Customer)

D. Thermistor (optional)

Can be mounted to cold side ceramics edge. Calibration is available by request.

E. Terminal contacts

- 1. Blank, tinned Copper
- 2. Insulated Wires
- 3. Insulated, color coded

Additional Options

TEC Polarity

TEC Polarity can be modified by request. The specified polarity in this datasheet is typical. It can be reversed in accordance to Customer application requirements.

Terminal Wires Options

The standard solution is with terminal wires. TEC can be modified for WB process by request. In this case terminal wires are not mounted, TEC has Au plated WB pads.

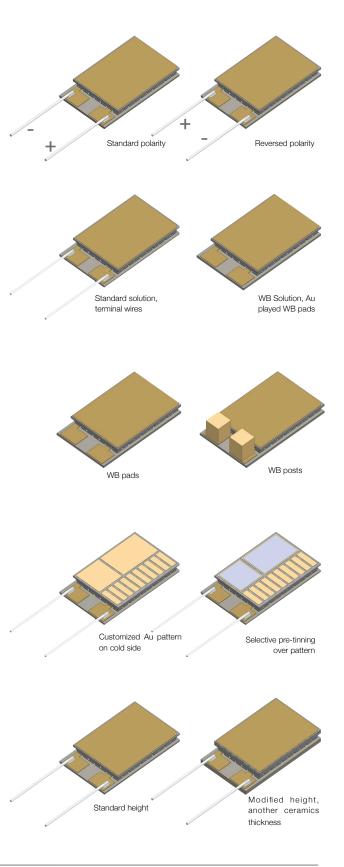

In case of WB optimization, the standard WB solution is with WB pads (no posts) by default. WB posts are available by request. The dimensions of WB posts can be modified and optimized for Customers application. WB posts are made of Copper, Au plated.

Customized Au Patterns

Customized Au patterns on thermoelectric cooler cold side are available by request. Selective Pretinning over pattern is also available. Please, contact RMT Ltd for additional information about customized Au patterns requirements.

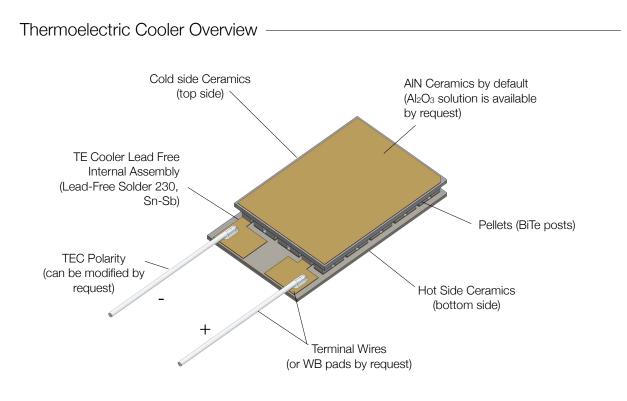

TEC Height modification

Standard TEC height can be modified without performance changes by using ceramics of different thickness. Standard thermoelectric cooler height (specified in this datasheet) can be modified in a range -0.5..+1.0 mm by request.

46 Warshavskoe shosse. Moscow 115230 Russia, ph: +7-499-678-2082, fax: +7-499-678-2083, web: www.rmtltd.ru

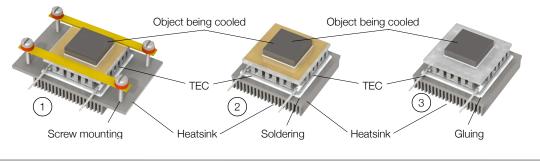

Application Tips

- 1. Never heat TE module more than 200°C (TEC assembled at 230°C).
- 1. Connect TE module to DC power supply according to polarity.
- 2. Never use TE module without an attached heat sink at hot (bottom) side.
- 2. Do not apply DC current higher than Imax.

Installation

- 1. <u>Mechanical Mounting</u>. TEC is placed between two heat exchangers. This construction is fixed by screws or in another mechanical way. It is suitable for large modules (with dimensions 30x30mm and larger). Miniature types require other assembling methods in most cases.
- 1. <u>Soldering</u>. This method is suitable for a TE module with metallized outside surfaces. RMT provides this option and also makes pre-tinning for TE modules.
- 2. <u>Glueing</u>. It is an up-to-date method that is used by many customers due to availability of glues with good thermoconductive properties. A glue is usually based on some epoxy compound filled with some thermoconductive material such as graphite or diamond powders, silver, SiN and others. The application of a specific type depends on application features and the type of a TE module.
