

DIMENSIONS

A = The number of equal spaces X "C" + "C"/2

B = The number of equal spaces X "C"

C = The distance from the center of one pin to the center of the next pin (pitch).
45 SERIES - "C" = .156
46 SERIES - "C" = .200

To determine the number of equal spaces, subtract (1) from the number of desired contact positions, i.e. a 28 position connector has 27 equal spaces.

PART NUMBERING

CONFIGURATION

S - Single Row

SERIES CODE

45 - .045 sq. header on .156 centers
46 - .045 sq. header on .200 centers

NUMBER OF POSITIONS

Single Row - 01 thru 20
Dual Row - 04 thru 40

MATING POST LENGTH (DIM "D")

75 - .750 (STANDARD)
for additional mating lengths, round off desired dimension (Ex. .305 - 30)

TERMINATION

P - Press Fit

PRESS FIT POST LENGTH (DIM "E")

21 - .215

PLATING

77-.000100 SnPb over .000050 Ni

(Consult factory for other options.)
