

## **POSITIVE FIXED VOLTAGE REGULATOR**

### **DESCRIPTION**

The SG140A/140 series of positive regulators offer self contained, fixed-voltage capability with up to 1.5A of load current and input voltage up to 50V (SG140A series only).

These units feature a unique on-chip trimming system to set the output voltages to within  $\pm 1.5\%$  of nominal on the SG140A series,  $\pm 2.0\%$  on the SG140 series, and  $\pm 4.0\%$  on the SG340 series. The SG140A versions also offer much improved line and load regulation characteristics. Utilizing an improved Bandgap reference design, problems have been eliminated that are normally associated with the Zener Diode references, such as drift in output voltage and large changes in the line and load regulation.

All protective features of thermal shutdown, current limiting, and safe-area control have been designed into these units and since these regulators require only a small output capacitor for satisfactory performance, ease of application is assured.

Although designed as fixed-voltage regulators, the output voltage can be increased through the use of a simple voltage divider. The low quiescent drain current of the device insures good regulation when this method is used.

Product is available in hermetically sealed TO-220 (both isolated and non-isolated), TO-3 and TO-66 power packages.

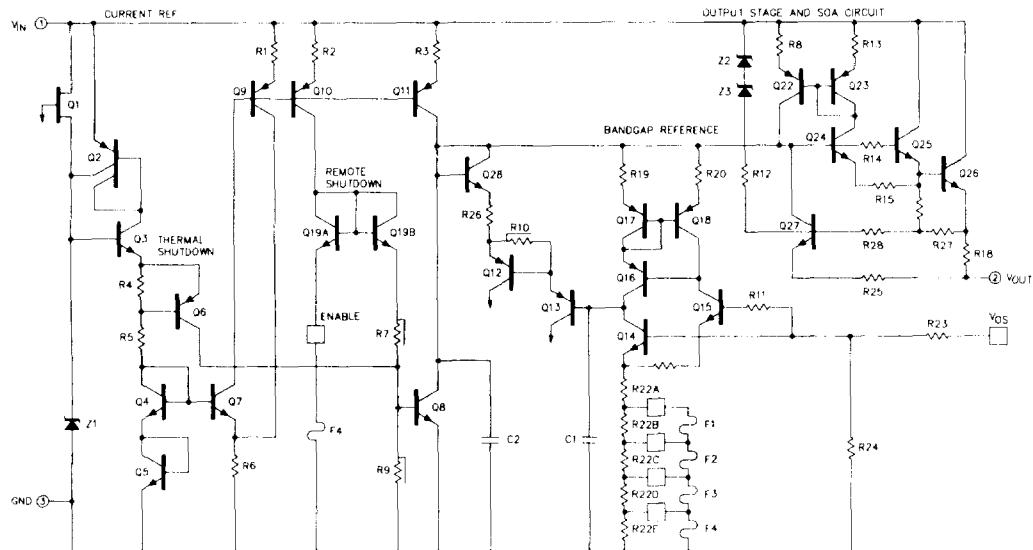

### **FEATURES**

- Output voltage set internally to  $\pm 1.5\%$  on SG140A
- Input voltage range to 50V max. on SG140A
- Two volt input-output differential
- Bandgap reference voltage
- Excellent line and load regulation
- Foldback current limiting
- Thermal overload protection
- Voltages available - 5V, 6V, 8V, 12V, 15V, 18V, 24V

### **HIGH RELIABILITY FEATURES - SG140A/140**

- ♦ Available to MIL-STD - 883
- ♦ Radiation data available
- ♦ SG level "S" processing available

### **SCHEMATIC DIAGRAM**

**ABSOLUTE MAXIMUM RATINGS** (Note 1)

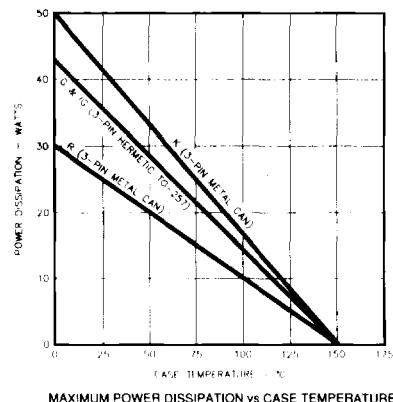

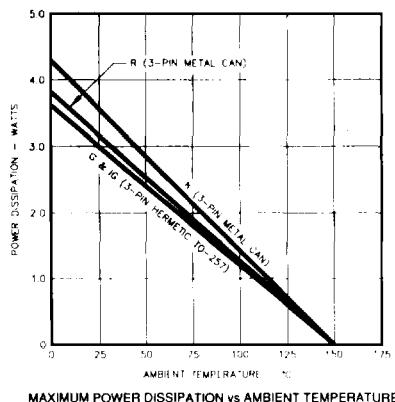

Device Output Voltage	Input Voltage	Input Voltage (transient) (Note 3)	Input Voltage Differential (Output shorted to ground)
5V	35V	50V	35V
6V	35V	50V	35V
8V	35V	50V	35V
12V	35V	50V	35V
15V	35V	50V	35V
18V	35V	50V	35V
24V	40V	50V	35V

Operating Junction Temperature

Hermetic (K, R, G, IG - Packages) ..... 150°C

Storage Temperature Range ..... -65°C to 150°C

Note 1. Values beyond which damage may occur.

**THERMAL DERATING CURVES****RECOMMENDED OPERATING CONDITIONS** (Note 2)

Operating Junction Temperature Range:

SG140A/140 ..... -55°C to 150°C

SG340A/340 ..... 0°C to 125°C

Note 2. Range over which the device is functional.

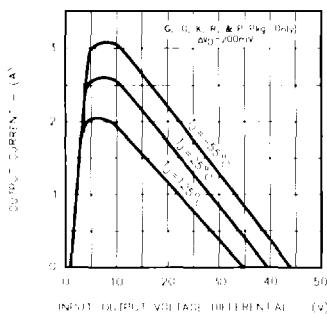

**CHARACTERISTIC CURVES**

FIGURE 1.  
PEAK OUTPUT CURRENT  
VS INPUT-OUTPUT DIFFERENTIAL

Note 3. Operation at high input voltages is dependent upon load current. When load current is less than 5mA, output will rise out of regulation as input-output differential increases beyond 30V. Note also from Figure 1, that maximum load current is reduced at high voltages. The 50V input rating of the SG140A series refers to ability to withstand high line or transient conditions without damage. Since the regulator's maximum current capability is reduced, the output may fall out of regulation at high input voltages under nominal loading.
