

H 7811

Description

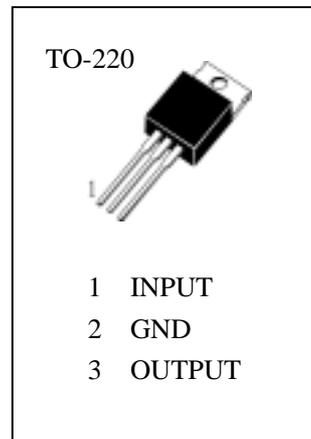

The H7811 series of three terminal positive Regulators are available in the TO-220 package and with several fixed output voltages, making them useful in a wide range of applications. Each type employs internal current limiting, Thermal shut down and safe operating area protection, making it essentially indestructible. If adequate heat sinking is provided, they can deliver over 1A output current. Although designed primarily as fixed voltage regulator, these devices can be used with external components to obtain adjustable voltages and currents.

Features

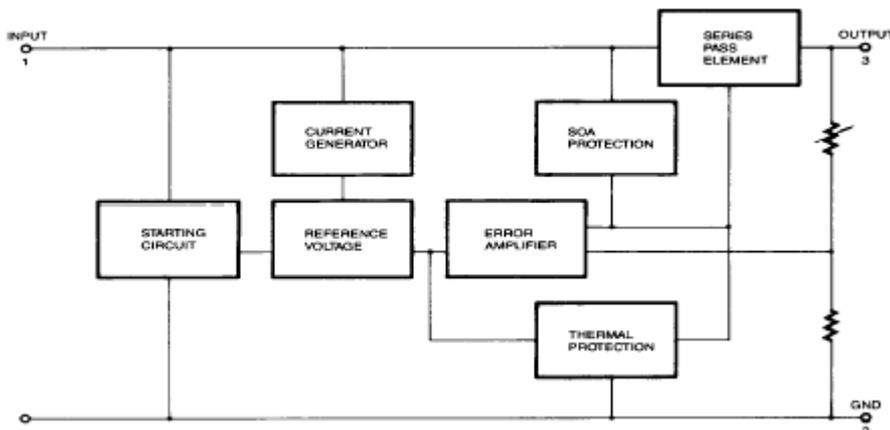

- Output current up to 1A
- Output Voltages of 11V
- Thermal Overload Protection
- Short Circuit Protection
- Output Transistor Safe Operating Area Protection

Absolute Maximum Ratings ($T_a=25^\circ\text{C}$)

V_I	—Input Voltage (for $V_O=5V$ to $18V$).....	35V
R_{JC}	—Thermal Resistance Junction-Cases.....	5 $^\circ\text{C}/\text{W}$
R_{JA}	—Thermal Resistance Junction-Air.....	65 $^\circ\text{C}/\text{W}$
T_{OPR}	—Operating Temperature Range.....	0~125
T_{STG}	—Storage Temperature Range.....	-65~150

Typical Applications

1、 DC Parameters

2、 Load Regulation

3、 Ripple Rejection

4、 Fixed Output Regulator

Notes:

- (1) To specify an output voltage, substitute voltage value for "XX." A common ground is required between the input and the Output voltage. The input voltage must remain typically 2.0V above the output voltage even during the low point on the input ripple voltage.
- (2) C₁ is required if regulator is located an appreciable distance from power Supply filter.
- (3) C₀ improves stability and transient response.

5、 Constant Current Regulator

6、 Circuit for Increasing Output Voltage

7、 Adjustable Output Regulator (7 to 30V)

Q1 = TIP42
Q2 = TIP42

$$R_{sc} = \frac{V_{BEQ2}}{I_{sc}}$$

9、 High Output Current with Short Circuit Protection

11、 Split Power Supply (±15V-1A)

$$R_1 = \frac{V_{BEQ1}}{I_{REG} - I_{O1} \beta_{O1}}$$

$$I_o = I_{REG} + \beta_{O1} (I_{REG} - V_{BEQ1}/R_1)$$

8、 High Current Voltage Regulator

10、 Tracking Voltage Regulator

12、 Negative Output Voltage Circuit

13、 Switching Regulator
