

Wire to Board Connectors

AMP Multiple Interlock Connectors (MIC)

Features

- Versatile applications from low level circuits to power level circuits.
- Mark I, Mark II and board mount connectors
- Free-hanging and panel mount styles in both Mark I and Mark II
- A double-lock plate available to ensure positive loading and retention of contacts within housing (for Mark II)
- Housing has contact cavities in two rows and is easy to assemble.
- Contacts available in brass and phosphor bronze with pretinned plating. Selective gold plating is also available.
- Receptacle contacts are of cantilever beam design for low mating-unmating force
- Contacts accept 0.3~2.27 mm² wire and can accommodate combination of two wires
- 66 Nylon housing
- Sizes: 5, 7, 9, 11, 13, 17 and 21 positions, plus 22-position board mount split type connector to accept 9- and 13-position connectors for wire.

MIC Connectors are a family of versatile nylon connectors designed for use in a wide range of applications from low level circuits to power circuits. In addition to their versatility, MIC Connectors have many outstanding features including reliable housing construction with positive locking and anti-scooping mechanisms for connector engagement, dual-beam cantilever spring design built into receptacle contacts, high resistance to vibration and shock. Other features include polarized housing design and doublerow contact cavities for ease of assembling. MIC Connectors comprise plug and cap assemblies for wire termination (free-hanging and panel mount types), board mount cap assembly and tab/receptacle contacts used for wire termination.

The connectors for wire termination are available in

two styles, Mark I and Mark II. These connectors employ exclusive snap-in contacts and are intermateable. In addition, a double-lock plate is provided for use with Mark II connectors which ensures positive loading and retention of contacts within the housing and also prevents connector halves from half-mating. This plate is applied after contacts have been loaded.

The board mount cap assembly is available in two styles for vertical and horizontal mounting. It accepts either Mark I or Mark II connector.

Product specifications

Current and voltage ratings:
10A, 350VDC or 250VAC
Dielectric withstanding strength:
1,800VAC, 1 minute
Insulation resistance:
100M Ω min. at 500VDC
Termination resistance:
3m Ω Max. (Initial)
6m Ω Max. (After test)
Operating temperature:
-30~+105°C

<Mark I>

Product specifications:
108-5093, 108-5099
Crimp specifications:
114-5004, 114-5018
Instruction Sheet: CM-056J

<Mark II>

Product specifications:
108-5165, 108-5166
Crimp specifications:
114-5071, 114-5072
Instruction sheet: CM-193J
