1. Introduction

The HLA.01 5150-5900 MHz ceramic chip antenna is specifically designed for Wi-Fi/ WHDMI applications where high data throughput is needed. It is a high efficiency miniature SMD edge mounted ceramic antenna with minimum footprint requirement. This ceramic chip antenna uses the main PCB as its ground plane, thereby increasing antenna efficiency. It is tuned for different PCB sizes by simply changing the value of the matching circuit. The HLA.01 with dimension of 3.2mm *1.6mm * 0.5mm, is one of the smallest antennas available worldwide. This antenna is delivered on tape and reel.

Applications

IEEE802.11a (5150-5900 MHz)
WHDMI PCMCIA cards or Wireless USB dongles
