Description

The OPV232 is a high performance 850nm VCSEL packaged for sensing applications. This product's combination of features including high speed, high output power and concentric beam makes it an ideal transmitter for integration into all types of position sensing equipment.

Applications include:

- Photoelectric Sensors
- Light Curtains
- Position Sensors
- Encoders

Absolute Maximum Ratings (T_A = 25° C unless otherwise noted)

Maximum Forward Peak Current	30 mA
Maximum Reverse Voltage	5 Volts
Storage Temperature	-40 to +125°C
Operating Temperature	-40 to +85° C
Soldering Lead Temperature	260° C for 10 Seconds

Additional laser safety information can be found on the Optek website. See application #221. Classification is not marked on the device due to space limitations. See package outline for centerline of optical radiance. Operating devices beyond maximum rating may result in hazardous radiation exposure.
