

HOA698X/699X

Transmissive Optoschmitt Sensor

FEATURES

- Direct TTL interface
- Buffer or inverting logic available
- Three device output options
- Four mounting configurations
- Choice of detector aperture
- 0.125 in.(3.18 mm) slot width
- 24.0 in.(610 mm) min. 26 AWG PVC insulated lead wires

DESCRIPTION

The HOA698X/699X series consists of an infrared emitting diode facing an Optoschmitt detector encased in a black thermoplastic housing. Detector switching takes place whenever an opaque object passes through the slot between emitter and detector. The photodetector consists of a photodiode, amplifier, voltage regulator, Schmitt trigger and various output configurations. The user can choose from available options: (1) detector aperture, (2) mounting tab configuration, (3) detector output configuration, and (4) housing material.

The HOA698X series utilizes an IR transmissive polysulfone housing which features smooth optical faces without external aperture openings; this feature is desirable when aperture blockage from airborne contaminants is a possibility. The HOA699X series employs an opaque polysulfone housing with aperture openings for use in applications in which maximum rejection of ambient light is important, and situations in which maximum position resolution is desired. The HOA698X/699X series employs plastic molded components. For additional component information see SEP8506 and SDP8XX4.

Housing material is polysulfone. Housing are soluble in chlorinated hydrocarbons and ketones. Recommended cleaning agents are methanol and isopropanol.

Device Polarity:

- Buffer - Output is LO when input excitation is zero.
- Inverter - Output is HI when input excitation is zero.

Wire color code and functions are:

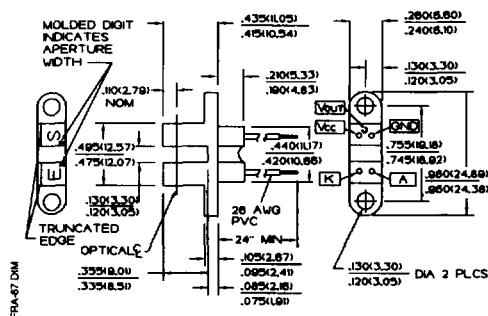

- | | |
|-------------------------|------------------------|
| Red - IRED Anode | White - Detector VCC |
| Black - IRED Cathode | Blue - Detector Output |
| Green - Detector Ground | |

Notes

- It is recommended that a bypass capacitor, 0.1 µF typical, be added between V_{CC} and GND near the device in order to stabilize power supply line.

ABSOLUTE MAXIMUM RATINGS

(25°C Free-Air Temperature unless otherwise noted)

Operating Temperature Range	-40°C to 70°C
Storage Temperature Range	-40°C to 85°C
Soldering Temperature (5 sec)	240°C
IR Emitter	
Power Dissipation	100 mW ⁽¹⁾
Reverse Voltage	3 V
Continuous Forward Current	50 mA
Detector	
Supply Voltage	
Totem-Pole Output	7 V ⁽²⁾
All Others	12 V ⁽²⁾
Duration of Output	
Short to V _{CC} or Ground	1.0 sec

Notes

- Derate linearly at 0.78 mW/°C above 25°C.
- Derate linearly from 25°C to 5.5 V at 70°C.
