### description

The CLE336 is an advanced, high-efficiency, high speed AlGaAs infrared emitting diode. Output power exceeds standard AlGaAs emitters by 50%. A special lens provides a sharply focused beam pattern. The CLE336 is designed for use anywhere a narrow beam pattern and very high output are required.

### notes:

1. 0.06" (1.5mm) from the header for 5 seconds maximum.
2. Derate linearly 0.64mA/°C free air temperature to T<sub>A</sub> = +150°C.
3. Derate linearly 1.28mW/°C free air temperature to T<sub>A</sub> = +150°C.

**Note:** 4. E<sub>e</sub> is a measure of irradiance (power/unit area) within a 0.444" (1.128cm) diameter area, centered on the mechanical axis of the device and spaced 2.54" (6.45cm) from the lens side of the tab. This is geometrically equivalent to a 10° cone.
