

# LS350 MONOLITHIC DUAL PNP TRANSISTOR

# Linear Systems Monolithic Dual PNP Transistor

The LS350 is a monolithic pair of PNP transistors mounted in a single P-DIP package. The monolithic dual chip design reduces parasitics and gives better performance while ensuring extremely tight matching.

The 8 Pin P-DIP provides ease of manufacturing, and the symmetrical pinout prevents improper orientation.

(See Packaging Information).

- Very high gain
- Tight matching
- Low Output Capacitance
