# Pulse-Width-Modulation Control Circuit

## MB3759

### PULSE-WIDTH-MODULATION CONTROL CIRCUIT PUSH-PULL/SINGLE-ENDED OUTPUT MODE

The Fujitsu MB3759 is complete pulse-width modulation control system on a single monolithic chip. The MB3759 consists of an internal 5.00V reference, two or-connected amplifiers, externally timed (or synchronized) oscillator and control ramp generator. The MB3759 provides for either push-pull or single-ended mode of operation with external control of dead-band.

The two NPN output transistors have uncommitted emitters and collectors that can be used to either sink or source up to 200mA each.

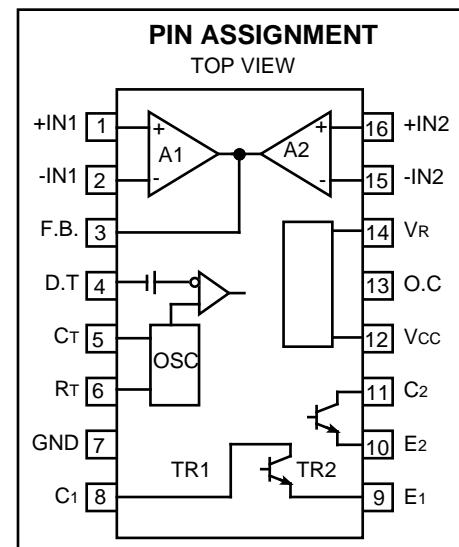

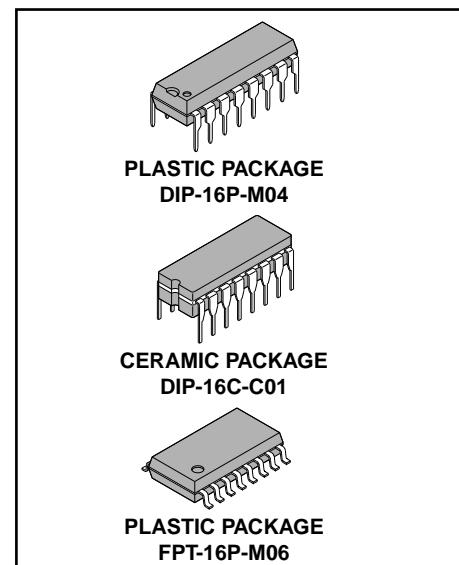

- Complete pulse-width-modulation system with power control circuit
- Either push-pull or single-ended mode of operation
- Internal circuitry prohibits double pulse at either output
- On-chip voltage reference (5V)
- Uncommitted output drivers
- Master or slave oscillator control
- Dual error amplifiers
- Under voltage lockout function
- Dead time adjustable
- Package: 16-pin Plastic DIP Package (Suffix -P)  
16-pin Ceramic DIP Package (Suffix -Z)  
16-pin Plastic FPT Package (Suffix -PF)

### ABSOLUTE MAXIMUM RATINGS (see NOTE)

Parameter	Symbol	Rating	Unit
Power Supply Voltage	Vcc	41	V
Collector Output Voltage	Vce	41	V
Collector Output Current	Ice	250	mA
Amplifier Input Voltage	Vin	Vcc +0.3	V
Power Dissipation	Plastic DIP	1000 (TA ≤ 25°C) 800 (TA ≤ 60°C) 620 (TA ≤ 25°C)*	mW
	Ceramic DIP		
	Plastic FPT		
Operating Temperature	DIP	-20 to 85	°C
	FPT	-20 to 75	°C
Storage Temperature	TSTG	-55 to 125	°C

\* PFT package is mounted on the epoxy board. (4cm x 4cm x 0.15cm)

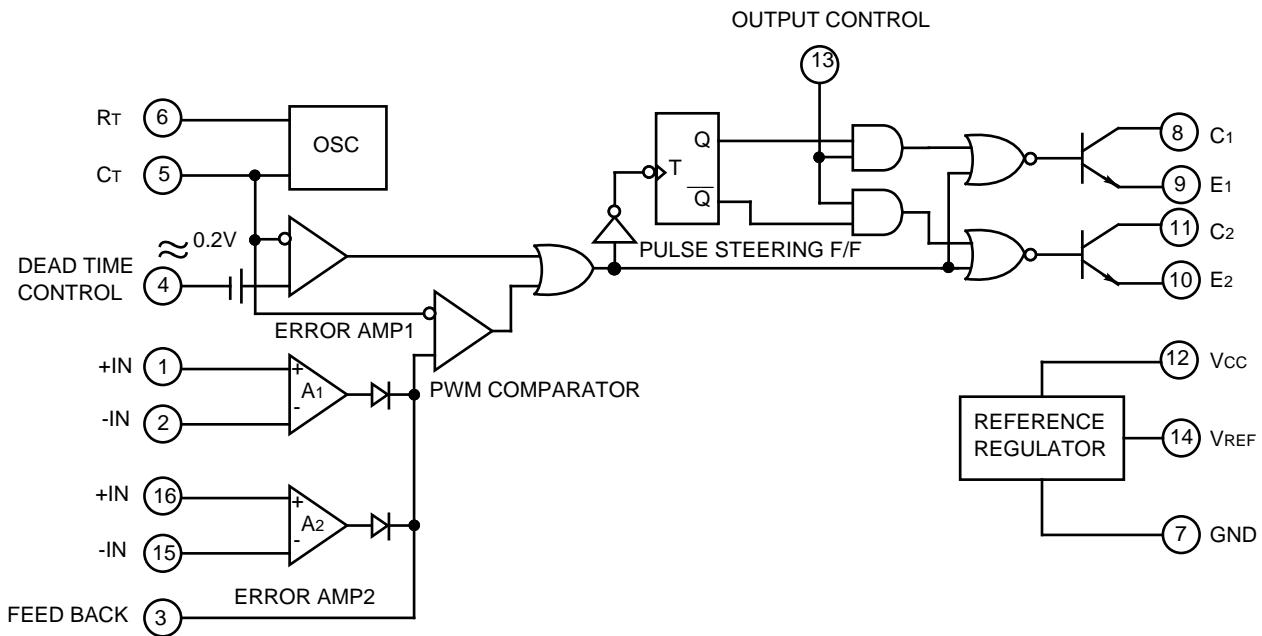

**NOTE:** Permanent device damage may occur if the above **Absolute Maximum Ratings** are exceeded. Functional operation should be restricted to the conditions as detailed in the operational sections of this data sheet. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

This device contains circuitry to protect the inputs against damage due to high static voltages or electric fields. However, it is advised that normal precautions be taken to avoid application of any voltage higher than maximum rated voltages to this high impedance circuit.

## ■ RECOMMENDED OPERATING CONDITIONS

Parameter	Symbol	DIP-package			FPT-package			Unit
		Min	Typ	Max	Min	Typ	Max	
Power Supply Voltage	V <sub>CC</sub>	7	15	32	7	15	24	V
Collector Output Voltage	V <sub>CE</sub>	-	-	40	-	-	40	V
Collector Output Current	I <sub>CE</sub>	5	100	200	5	50	100	mA
Amplifier Input Voltage	V <sub>IN</sub>	-0.3	0 to V <sub>REF</sub>	V <sub>CC</sub> -2	-0.3	0 to V <sub>REF</sub>	V <sub>CC</sub> -2	V
FB Sink Current	I <sub>SINK</sub>	-	-	0.3	-	-	0.3	mA
FB Source Current	I <sub>SOURCE</sub>	-	-	2	-	-	2	mA
Reference Section Output Current	I <sub>REF</sub>	-	5	10	-	3	10	mA
Timing Resistor	R <sub>T</sub>	1.8	30	500	1.8	30	500	kΩ
Timing Capacitor	C <sub>T</sub>	470	1000	10 <sup>6</sup>	470	1000	10 <sup>6</sup>	pF

FUJITSU semiconductor devices are intended for use in standard applications (computers, office automation and other office equipment, industrial, communications, and measurement equipment, personal or household devices, etc.).

### **CAUTION:**

Customers considering the use of our products in special applications where failure or abnormal operation may directly affect human lives or cause physical injury or property damage, or where extremely high levels of reliability are demanded (such as aerospace systems, atomic energy controls, sea floor repeaters, vehicle operating controls, medical devices for life support, etc.) are requested to consult with FUJITSU sales representatives before such use. The company will not be responsible for damages arising from such use without prior approval.

Any semiconductor devices have inherently a certain rate of failure. You must protect against injury, damage or loss from such failures by incorporating safety design measures into your facility and equipment such as redundancy, fire protection, and prevention of over-current levels and other abnormal operating conditions.

If any products described in this document represent goods or technologies subject to certain restrictions on export under the Foreign Exchange and Foreign Trade Control Law of Japan, the prior authorization by Japanese government should be required for export of those products from Japan.
