1. Introduction

The MA950 Guardian is a next generation combination antenna. The first panel antenna worldwide designed for IoT Gateway and Router devices. It is a low profile 5in1 wall and adhesive mount antenna. It is a heavy-duty, fully IP67 waterproof resistant external M2M antenna for use by RF professionals in

- IoT Gateway and Routers
- HD Video Streaming
- Transportation
- Remote Monitoring Applications

This antenna delivers powerful MIMO antenna technology for worldwide 4G LTE bands at 698-960MHz /1710-2170MHz /2490-2690MHz /3300-3600MHz bands, dual 2.4/5.8GHz Wi-Fi, plus GPS-GLONASS-BeiDou for location accuracy. It enables designers to install only one antenna to cover all of these technologies.

4G wireless applications demand high speed data uplink and downlink. High efficiency and high gain MIMO antennas are necessary to achieve the required signal to noise ratio and throughput required to solve these challenges. Taoglas also takes care to have high isolation among these antennas to prevent self-interference. Low loss cables used to keep efficiency high over long cable lengths.

The GPS-GLONASS-BeiDou active antenna has been carefully designed for excellent performance across all GNSS bands, leading to higher location accuracy and stability of tracking in urban environments.

The housing dimension is 146*134*20mm. It is IP67 waterproof and comes with 3M foam adhesive. The antenna can be mounted internally or externally on a vehicle. The MA950 comes with 1 meter, low loss KSR-200P coaxial cables for the LTE and Wi-Fi antennas, and RG174 coaxial cable for the GNSS antenna as standard. Customized cables and connector versions are also available
